

# Motorola V190 Battery Replacement

How to replace the battery for a Motorola V190 flip phone.

Written By: Michael Pollock

## INTRODUCTION

If your Motorola V190 cellular phone is repeatedly shutting down, dying, or otherwise running faulty, follow this guide to replace the battery. The battery is one of the essential components of the phone, and it ensures that the phone has enough power to operate.

The Motorola V190 takes a Duracell Ultra CEL10016A battery, and a new battery will need to be charged upon installation.

Make sure to power down your phone before beginning.

## Step 1 — Battery

- Press the button at the bottom of the back cover.
- Pull the back cover down.
- Remove the battery.
- ⓘ Our device is missing the battery.

To reassemble your device, follow these instructions in reverse order.
