

# Motorola V2397 Phone Disassembly

Prerequisite Only

Written By: Chris

## TOOLS:

- [Spudger](#) (1)
-

## Step 1 — Battery

- Press and hold the button on the battery cover
- Pull the battery cover down and out to remove it

## Step 2

- Remove the batteries by pulling them away from the phone

### Step 3 — Back Cover

- Using the Torx T4 screwdriver remove the six screws highlighted in the picture to the left

### Step 4

- Use your fingers or a spudger to remove the back cover

## Step 5 — Phone

- Place your plastic opening tool in between the motherboard and the front cover of the phone
- Apply a small force to lift the motherboard away from the front cover

To reassemble your device, follow these instructions in reverse order.
