

# Motorola V276 Battery Replacement

Written By: Jason Kilroy

# INTRODUCTION

Replacing phone battery.

## TOOLS:

- [Spudger \(1\)](#)

## PARTS:

- [Lithium ion battery \(1\)](#)  
*820 mAh*

## Step 1 — Battery

- Locate the silver button on the back of the phone, near the bottom.
- Depress the silver button with one hand and slide the back cover of the phone *away* from the antenna.

***(i)*** The back cover should slide off easily.

## Step 2

- Insert a plastic spudger near one corner of the battery (preferably one furthest from the phone's antenna).
- Gently pry the battery up and away from the phone. The battery should easily raise out of its place.
- Now that the battery is exposed, use your fingers to remove it from the phone.

## Step 3

- Note the metal connections on the phone, which are now exposed with the battery removed.
- There are corresponding metal connectors on the replacement battery.
- When you install the battery, be sure both connectors are matched up. Otherwise, your battery will be unable to supply power to your phone.

To reassemble your device, follow these instructions in reverse order.
