

# Motorola V60s Speakers Replacement

Written By: Eric Freeman

# INTRODUCTION

This is a guide showing how to replace the Motorola V60 speakers.

## TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Spudger](#) (1)
  - [T6 Torx Screwdriver](#) (1)
-

## Step 1 — Battery

- Remove the battery cover by pushing down the release lever at the top of the phone while prying off the cover.
- Set the cover aside.

## Step 2

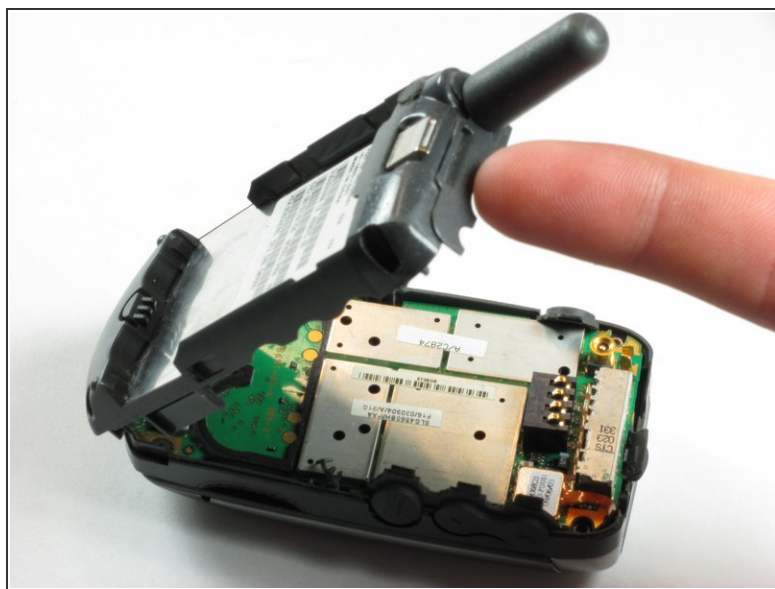

- Remove the battery by grabbing it near the bottom and lifting out.

## Step 3 — Speakers

- Unscrew four corner screws with T6 screwdriver.
- Note: Top screws are silver and short while bottom screws are black and longer.

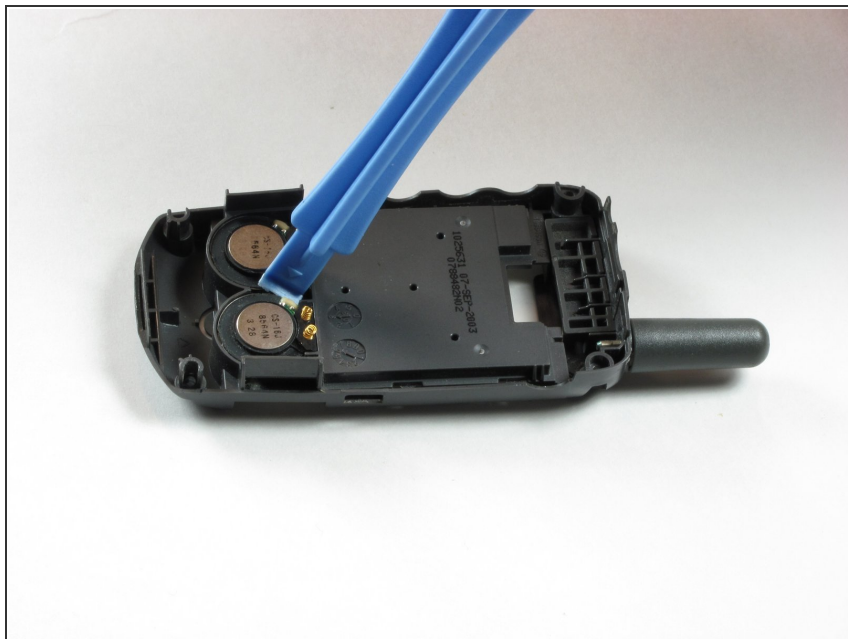

## Step 4

- Pry off back chassis by wedging spudger in crevice between back panel and phone and lifting.

## Step 5

- Insert spudger between speaker and back chassis and lifting.
- Note: This may take some effort.

To reassemble your device, follow these instructions in reverse order.
