Motorola i710 Keypad Cover Replacement

This guide will illustrate how to access the keypad cover.

Written By: Katelyn
INTRODUCTION

Once the back cover, battery, motherboard, and keypad have been removed, the keypad cover will be accessible for removal.
🔧 TOOLS:

- T5 Torx Screwdriver (1)

Step 1 — Battery Cover

- Slide the cover release button towards the bottom of the phone

- Once the battery cover pops up, slide the cover towards the top of the phone and lift up.
Step 2 — Battery

- Push the battery towards the top of the phone and lift up.

Step 3 — Back Casing

- With a T5 screwdriver, unscrew the four T5 sized screws that hold the case back cover onto the rest of the case.

- Remove the plastic case back cover by gently pulling it away from the body of the phone, starting at one edge and working your way down to the other.

Step 4 — Motherboard

- Lift the motherboard away from the case of the phone, being careful not to break the wire that goes up into the hinge.

- Peel the motherboard off of the keypad. The two pieces are glued together and separate without much effort.

- The motherboard should now be completely disconnected from the phone.

Step 5 — Keypad Sensor

- Once the motherboard has been removed from the keypad, the keypad sensor can be detached from the phone at the hinge.

- Gently pry off the cable connecting the keypad sensor. The keypad sensor should now be completely separated from the phone.

Step 6 — Keypad Cover

- Once the keypad has been removed, the keypad cover can be easily peeled back from the front phone cover molding.

- (i) Care must be taken when inserting a new keypad cover. The keypad cover will have to be lined up to the corresponding holes of the phone casing.

To reassemble your device, follow these instructions in reverse order.
