

# Motorola i850 Speaker Replacement

Written By: Kevin Dermody

---

## INTRODUCTION

Replace the speaker in the phone.

### TOOLS:

- [Flathead 3/32" or 2.5 mm Screwdriver](#) (1)
-

## Step 1 — LCD Board

- Open the flip cover of the phone with the LCD screen facing towards you.

## Step 2

- Use a Razor Blade to remove the screw covers.

⚠ Razor Blade is very sharp. Use caution.

## Step 3

- Unscrew the screws using a Phillips #00 Screwdriver.

## Step 4

- Insert a Spudger into the side crack of the flip cover and slowly separate the phone cover from the case.

## Step 5

- Gently separate the flip cover case from the phone with your hands when the crack is wide enough.

## Step 6

- Partially close the flip cover of the phone in order to take off the outer case.

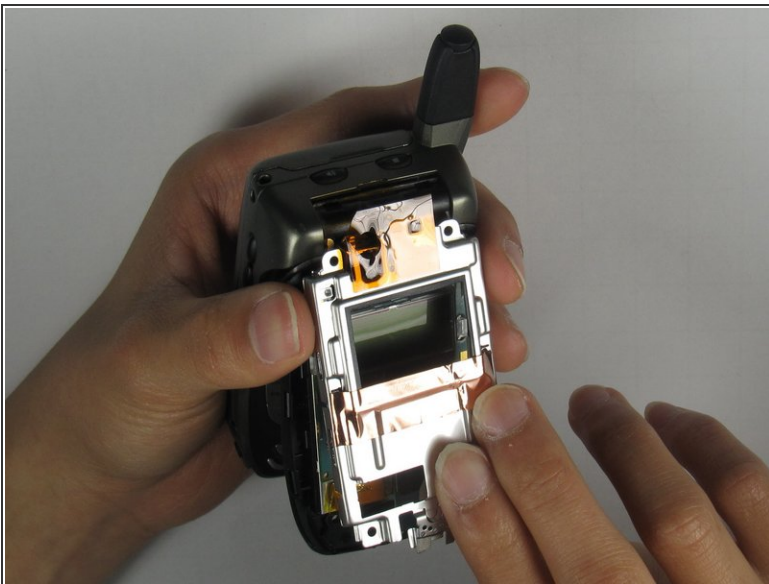

## Step 7

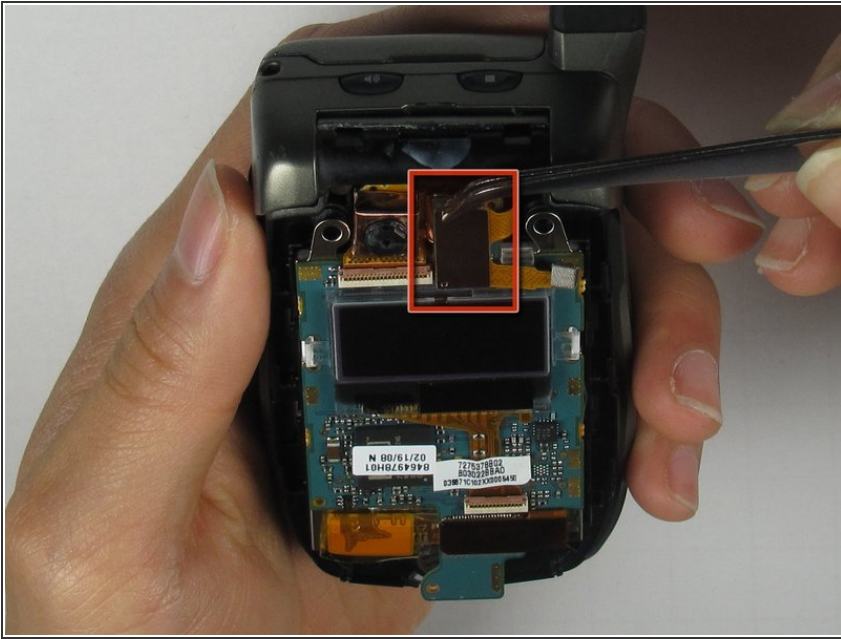

- Completely remove the outer casing from the phone.

## Step 8

- Place your thumb underneath the protective metal covering to remove it from the phone.

## Step 9

- Gently detach the black microchip from the phone with a Tweezer.

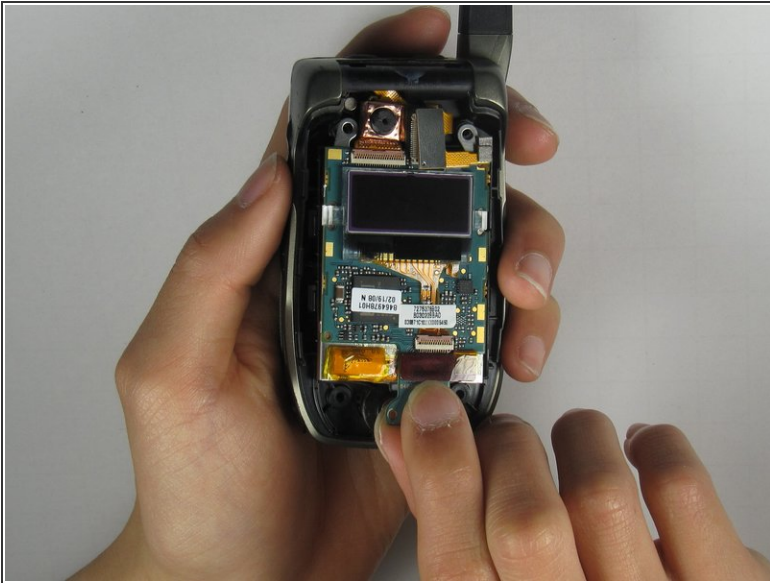

## Step 10

- Prop out the LCD board from the phone using your fingertips.

## Step 11

- Remove the LCD board from the phone by grabbing the bottom side of the LCD board.

## Step 12 — Speaker

- Use a flathead screwdriver to gently remove the speaker.

## Step 13

- Insert the new speaker into the phone and it should look like the image at left.

To reassemble your device, follow these instructions in reverse order.
