

Nabi 2 Back Cover Removal

Prerequisite Only. This guide shows how to open up the back of the Nabi 2.

Written By: Amy

INTRODUCTION

This guide shows how to safely remove the back of the Nabi 2. This repair guide is the starting point to replace or repair the internal components of the tablet. There are two important things to keep in mind when following this guide. First, when prying apart the plastic clips to separate the front and the back of the device, do so carefully and slowly to ensure that the clips do not break. Secondly, once the clips are removed, carefully separate the halves so that you do not damage the display cables.

TOOLS:

- [iFixit Opening Tools \(1\)](#)
- [Phillips #000 Screwdriver \(1\)](#)

Step 1 — Nabi 2 Back Cover Removal

- Remove the rubber bumper from the tablet.

Step 2

- With a PH00 screwdriver, remove the four outermost screws from the back of the tablet.

Step 3

- Carefully, insert a plastic opening tool into the seam of the device and begin gently prying the two plastic pieces apart.
- Work the tool all the way around the device. Small plastic clips should release. If they do not, gently apply outwards pressure until the clips give.

(i) Do not force the clips open, as they are fairly easy to break

To reassemble your device, follow these instructions in reverse order.
