

Neato Botvac D75 Battery Replacement

Procedures to remove the battery from the Neato Botvac D75.

Written By: Juan Cornejo

INTRODUCTION

The battery is made from Nickel Metal Hydride (NiMH) with 3600mAh battery capacity and 12 Volt DC.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
- [Flathead 3/32" or 2.5 mm Screwdriver](#) (1)

PARTS:

- [Neato Botvac 70e, 75, 80 and 85 Repalcement Battery](#) (1)

Step 1 — Battery

- Use Phillips #1 screwdriver to unscrew the two bottom cover screws

⚠ Be careful, the screws are self-retained on the cover itself and does not come off the battery cover.

Step 2

- Lift battery cover out.

Step 3

 Be careful when taking out the battery. Do not pull on the wires or battery trying to get the connector out.

- The cord has prongs on it that are a little difficult to get out. Use a flathead screwdriver to press the release tab on the connector to remove it.

To reassemble your device, follow these instructions in reverse order.
