INTRODUCTION

Hello! Today I will show you the steps that will help you take out the main brush of your device to clean it or replace it

TOOLS:

- T10 Torx Screwdriver (1)

Step 1 — Brushes

- To remove the rotary brush simply grasp it firmly and pull it off.

Step 2

- Once you have everything out get the plastic opening tool and pry open the large black plastic piece.
 - With a little force it should come out.

★ The boxes show you were the clips are that hold this piece

Step 3

- Once the black piece has been taken out, the brush just comes out easily.

To reassemble your device, follow these instructions in reverse order.
