

# Neato Botvac D8000 Air Filter Replacement

This guide provides information on the replacement of the air filter.

Written By: Diana Leal

## INTRODUCTION

This is a step-by-step instruction guide on how to replace the air filter. This may be needed if robot is not collecting dust or may need a cleaning.

## Step 1 — Air Filter

- Grasp the top latch of the filter cover and gently lift up to reveal the air filter.

## Step 2

- After you take out the holster from the robot, pull the tab to remove the filter.

## Step 3

- Once the filter has been completely removed, you may clean or replace the filter.

To reassemble your device, follow these instructions in reverse order.
