INTRODUCTION

This guide is used to replace the back cover of the device or as a precursor to accessing the internal components of the device.

🔧 **TOOLS:**

- iFixit Opening Tools (1)

⚙ **PARTS:**

- Nexus 7 (2nd Gen) Rear Case (1)
- Nexus 7 (2nd Gen LTE) Rear Case (1)

Step 1 — Back Cover

- Power down your device.

- Use your plastic opening tool to wedge between the seams around the sides of the device. Pry open each side, one at a time.

⚠️ Do not pry near the USB port at the base of the device as you may crack the rear panel.

Step 2

- Work fingers around the seam between device and back cover. Use your plastic opening tool and fingers to separate each side until device and back cover are completely apart.

⚠️ Be careful around the corners. The body of the device can be fragile.
