

# Nike shoe Sole Replacement

This guide will repair any shoe that has a hole in the bottom on the sole or is ripped on the bottom.

Written By: Marcus Povlick

## INTRODUCTION

Many people throw their shoes away once the sole splits because it seems like it is useless. But actually its way cheaper to repair it than go buy a new shoe. This particular guide can save many people money and allow them to keep some of their favorite shoes. With all the money you save, you could buy an abundance of anything with.

### **TOOLS:**

- [Barge Cement Infinity Glue \(1\)](#)
- [Knife or key \(1\)](#)

### **PARTS:**

- [new shoe sole \(1\)](#)

## Step 1 — Sole

- Place shoe upside down.

## Step 2

- Wedge knife or key into the area where the shoe and sole meet.

## Step 3

- Peel the sole off of the bottom of the shoe.

## Step 4

- Wipe away any dirt or residue on the bottom. does not have to be spotless.

## Step 5

- Place shoe glue on the bottom of the shoe.

## Step 6

- align the sole with the shoe perfectly and press them together. Allow to sit for at least a day before testing them out.

The shoe will be as good as new, if you don't allow to dry long enough just retry the steps 4 through 6.
