

Nikon Coolpix 5400 Back Cover Replacement

This guide will show you how to remove and replace the back case of the Nikon Coolpix 5400 camera.

Written By: Rhett Myers

INTRODUCTION

This guide will walk you through how to remove the back case of the Nikon Coolpix 5400. The process only requires a handful of screws to be removed and a few connecting wires. When removing the wire connectors, be careful not to break the plastic fittings.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Back Cover

- Remove one 3.0mm Phillips #0 screw from the top of the case.

Step 2

- Remove two 3.0mm Phillips #0 screws from the card reader side of the case.

Step 3

- Remove four 3.0mm Phillips #0 screws from the bottom of the camera.

Step 4

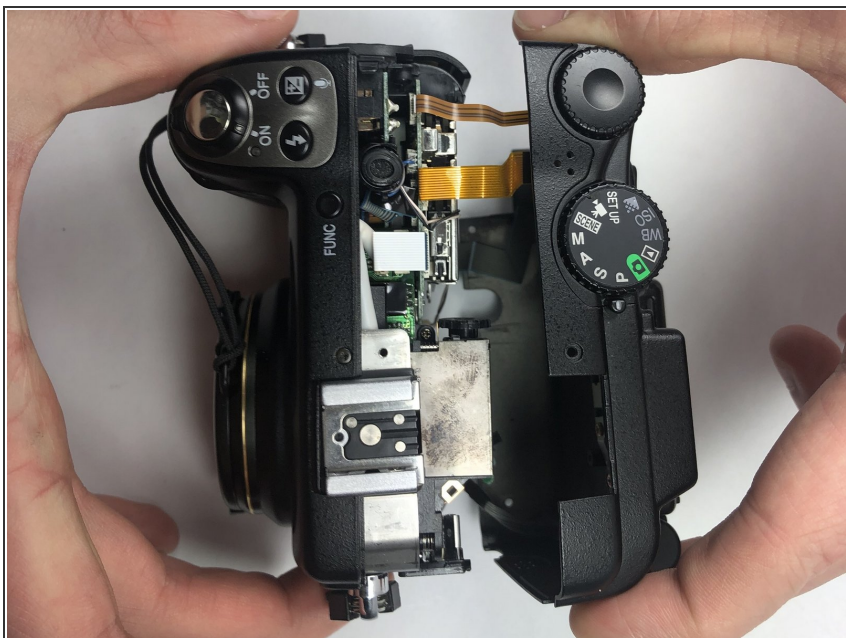

- Remove one 3.0mm Phillips #0 screw from the side of the camera.

Step 5

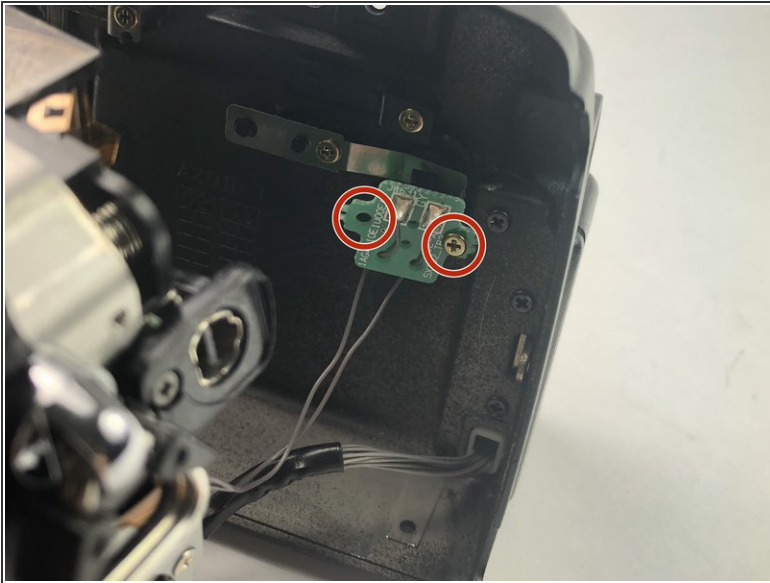

- Use a plastic opening tool to gently remove the back case from the rest of the camera.

Step 6

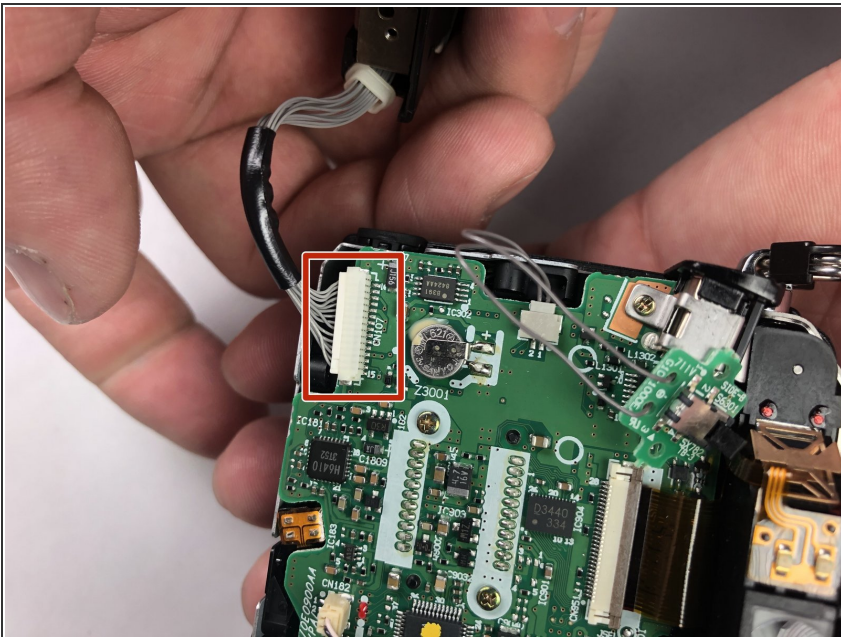

- Pull the back of the camera cover apart.
- ⚠ Connecting wires that are still attached to the back cover are fragile.

Step 7

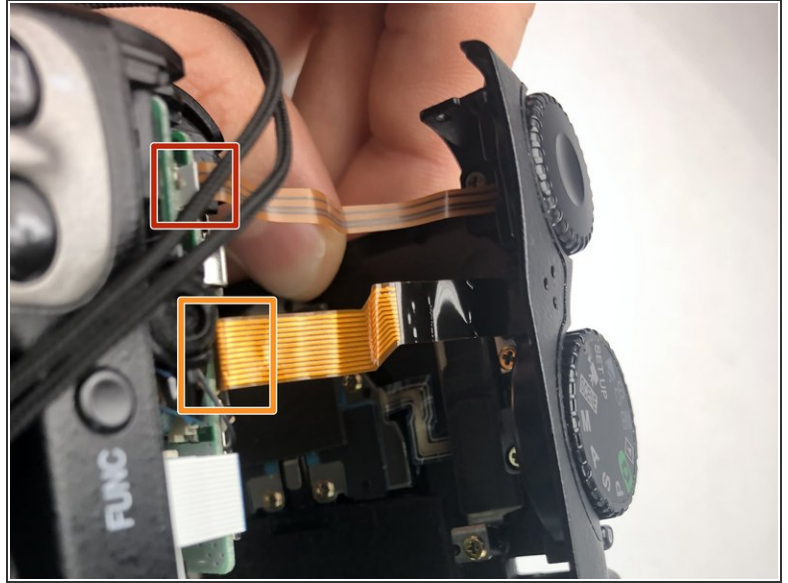

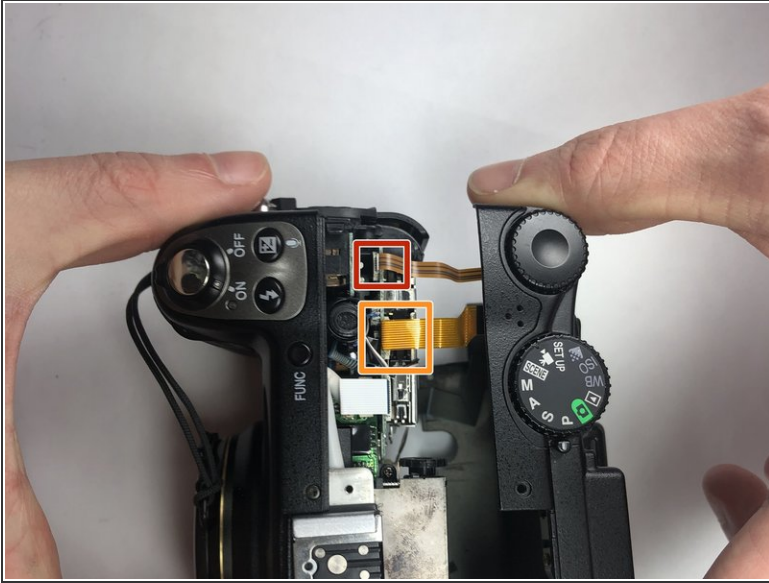

- Remove the two 4.0mm Phillips #0 screws holding the circuit board to the back case.

Step 8

- Pull the LCD screen cables in the direction that the wires are exiting the circuit board.
- ⚠ Pull the wire connector gently, the plastic is very fragile.

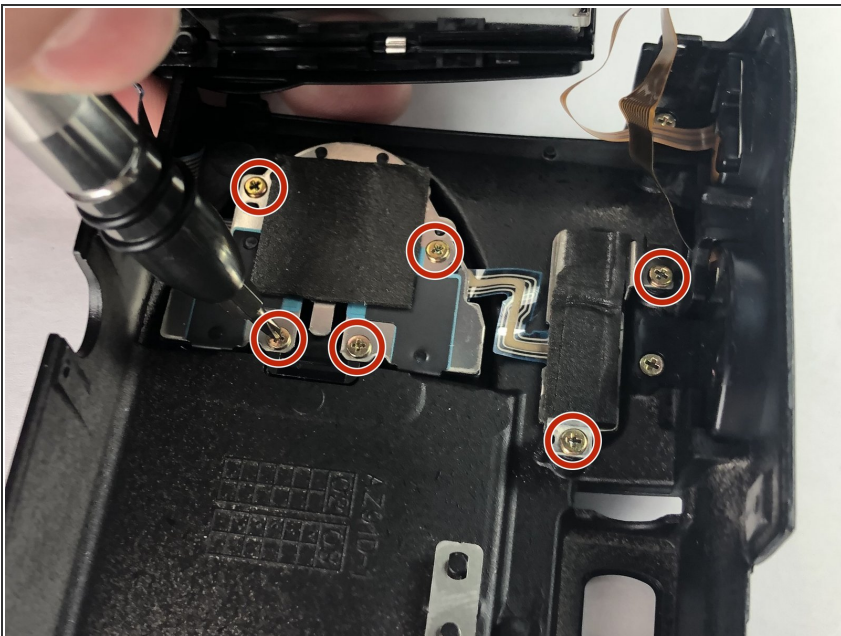

Step 9

- Pull the toggle wheel wire connector up and away from the top of the camera.
- Pull the button control panel wire connector up and away from the top of the camera.

⚠ Gently remove the wire connectors; the plastic is fragile.

Step 10

- Remove the six 3.0mm Phillips #0 screws holding the button control panel.
- Remove the back cover from the camera body.

To reassemble your device, follow these instructions in reverse order.
