## INTRODUCTION

The guide will show you step by step on how to replace the rear buttons of this device.

### TOOLS:

- [iFixit Opening Tools](#) (1)
- [Phillips #000 Screwdriver](#) (1)

## Step 1 — Back Panel Disassembly

- With the battery door facing upward, take your PH000 screwdriver and remove the 4 mm screws from the bottom of the device.

## Step 2

- After removing the screws, rotate the device to where the micro USB port is facing up.
- Now, take your PH000 screwdriver and remove the two 4 mm screws from the device.

## Step 3

- Rotate the device 180 degrees so that the opposite side of the device is now facing upwards.
- Now, take your PH000 screwdriver and remove the two 4 mm screws from the device.

## Step 4

- After all of the screws are removed, rotate the device so that the bottom of the device is now facing upward.
- With your index finger, press down and slide open the memory card/battery door.

## Step 5

- Now take the plastic opening tool, and place it in the seam of the device.
- Now, work the tool around the seam of the device until you can safely pry open the device.

## Step 6

 Be careful when removing the back piece of your device.

- Using your free hand, finish prying off the back piece of the device.

## Step 7 — Rear Buttons

- Take the rear panel of the device in the palm of your hand with the buttons facing downward.

## Step 8

- On the back side of the device's rear panel, you will see the plastic brackets that hold the rear function buttons in place.
- With your other hand, take the pry tool and start working your way around the edge of the buttons

## Step 9

- Now, take the hand that was previously holding the pry tool, and finish pulling off the rear function buttons.

To reassemble your device, follow these instructions in reverse order.
