Step 1 — Battery

- Turn the camera upside down and locate the battery compartment.

- Slide the compartment open following the direction of the arrow.

Step 2

- Press the orange release button to release and remove the battery.

- Replace or insert battery in it's respective terminals

Step 3 — Outer Casing

- Remove the four 0.1mm screws from the bottom of the camera using the phillips head screwdriver

- Using the same screwdriver, remove the 2 screws on the side of the camera.

- Remove the 2 screws from the other side of the camera.

- ⓘ One of the screws is under the I/O port cover.
Step 4

- Use the plastic opening tool to carefully separate the cover from the camera.

- Work the plastic opening tool around all the edges of the front plate.

- Pull the purple plastic cover off gently from the screen.

Step 5

- Turn the camera over so the LCD screen is facing you.

- Carefully remove the front shell by gently prying around the corners with the plastic opening tool until it releases.

Step 6

- Be careful to keep track of little pieces of the outside casing.

Step 7

- Carefully remove the top button casing by pulling it away from main camera.

To reassemble your device, follow these instructions in reverse order.
