

# Nikon D7000 Shutter Replacement

last step in the lock exchange. shutter replace.

Written By: Charly

 **TOOLS:**

- [New Item \(1\)](#)

 **PARTS:**

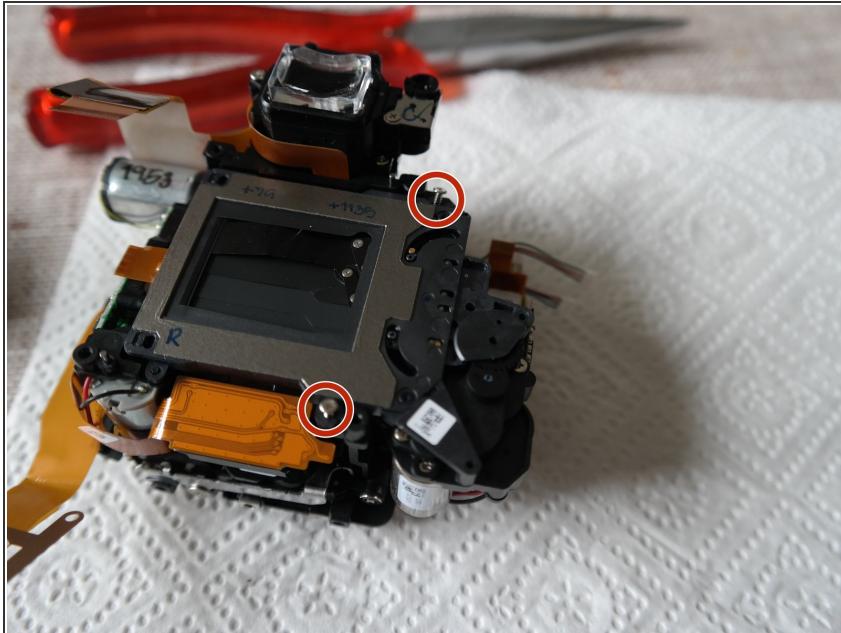

- [New Item \(1\)](#)

## Step 1 — Shutter

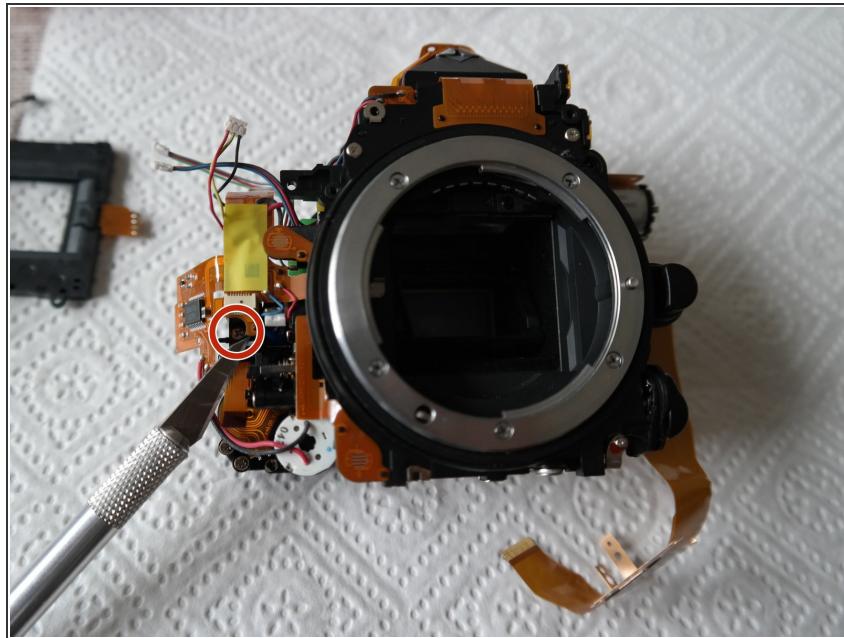

- If the shutter looks like that, nothing works.

## Step 2

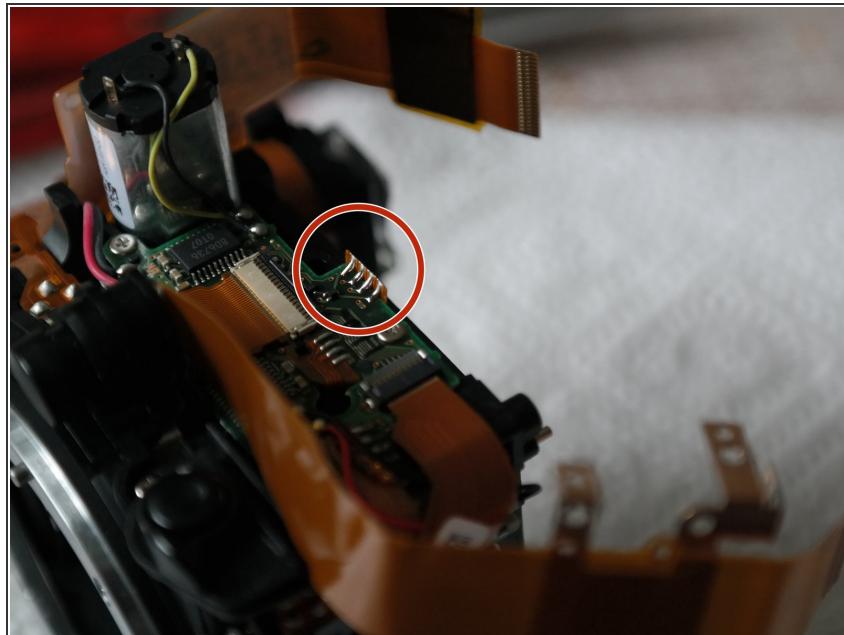

- Remove 2 screws.

## Step 3

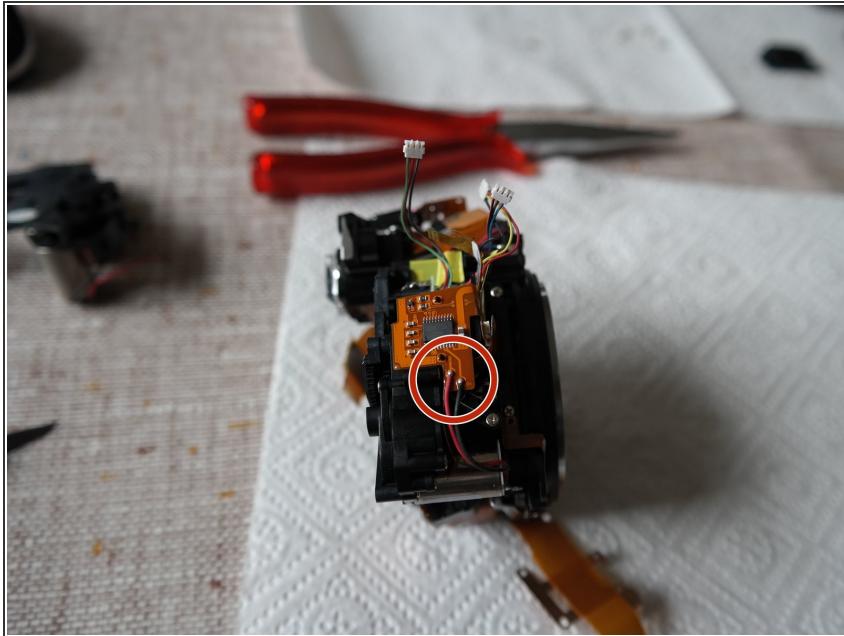

- Pull off the flex cable and remove the 3rd screw underneath.

## Step 4

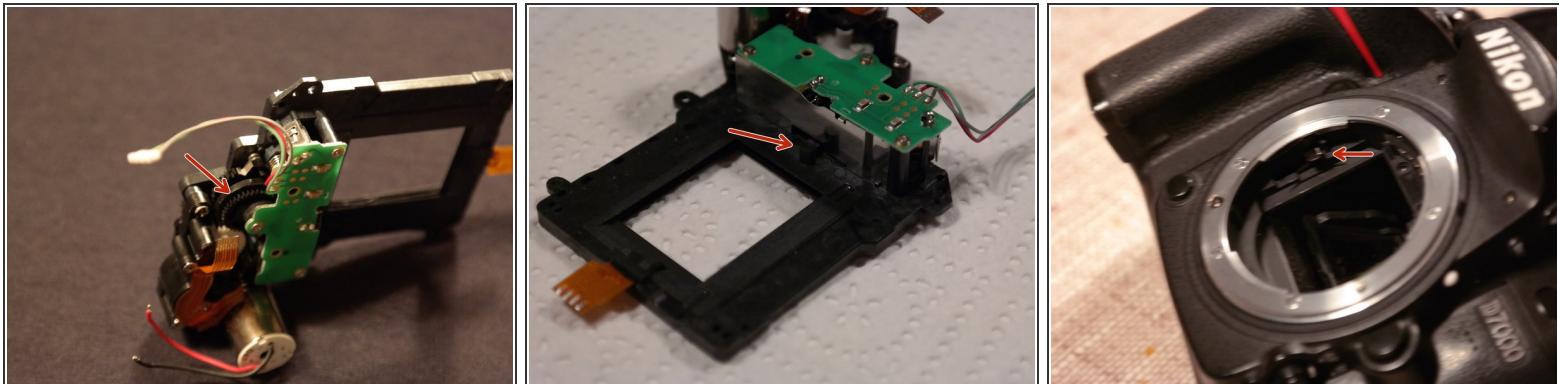

- Desolder 4 solder bridges

## Step 5

- Unsolder the motor cable

## Step 6

- Turn the gears to open the curtain.
- The lever is then right.
- When assembling, press the shutter lever down.

Repeat the steps in order to reassemble your device.
