

Ninja Coffee Bar CF080 Brewer Head Replacement

Use this guide to replace the brewer head in your Ninja Coffee Bar CF080.

Written By: Elizabeth Nguyen

INTRODUCTION

This guide will show how to remove the brewer head from the coffee machine.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Brewer Head

- Face the coffee machine in front of you.
- ❗ Make sure that the coffee machine is unplugged.
- ☑ Remove the glass carafe as it will not be needed.

Step 2

- Firmly grab the tab sticking out from the head of the brewer.

Step 3

- With little force, pull the tab of the brewer head in reverse direction.

Step 4

- Slide off the head in the direction away from the machine.

⚠ If the head does not come off smoothly by sliding, give a firm tug in the same direction.

Step 5

- Hold the head in the same position and lift it forward until the Ninja is facing upward toward the ceiling.

Step 6

- ⓘ Now the brewer head is positioned to where you can see the bottom.

Step 7

- Remove the screw with a Phillips #1 screwdriver.
- ✦ Use Phillips #1 screwdriver.
- ⓘ Along will come a small black screw cover and spring

Step 8

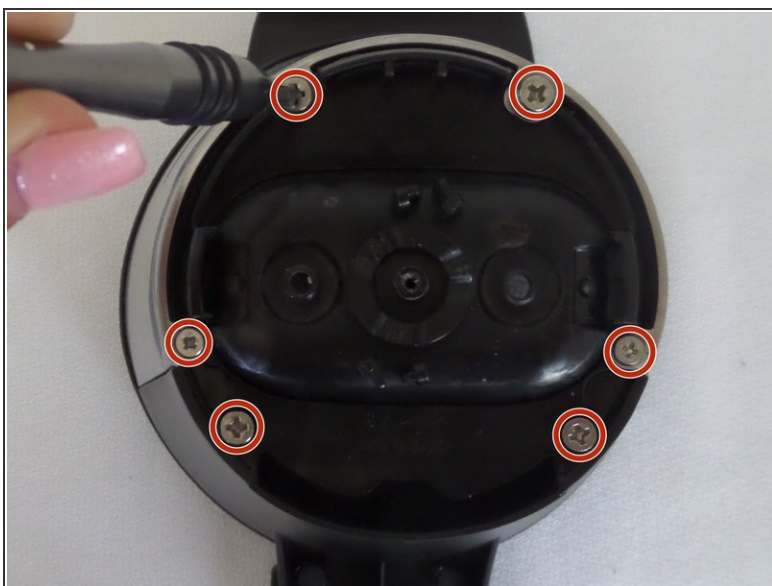

- Twist the black lid on top clockwise until it is completely detached.

Step 9

- i** With the black upper lid detached, a smaller black cover can be removed without effort.

Step 10

- Remove the 6 screws from the seal with a Phillips #1 screwdriver.

Step 11

i Once all screws are detached from the brewer head, it will be separated into two pieces leaving the filter.

To reassemble your device, follow these instructions in reverse order.
