

# Nintendo DSi XL Wi-Fi Antenna Replacement

Replace or repair a faulty Wi-Fi antenna.

Written By: Brett Hartt

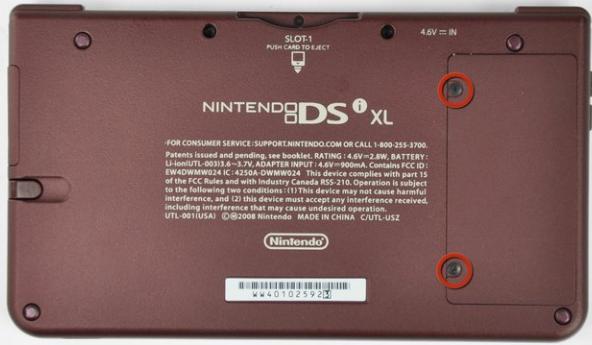

## PARTS:

- [Nintendo DSi XL Wi-Fi Antenna \(1\)](#)

## Step 1 — Battery

- Remove the two Phillips screws securing the battery cover to the back of the handheld console.
- Lift the battery cover off the back of the DSi XL.

## Step 2

- Lift the battery from the DSi XL.

## Step 3 — Lower Case

- Remove the four rubber screw covers on the lower case by prying them up with a push pin.

## Step 4

- Remove the following seven Phillips screws that secure the lower case to the rest of the DSi XL:
  - Four silver 5.3 mm screws
  - Two black 5.3 mm screws
  - One black 2.5 mm screw

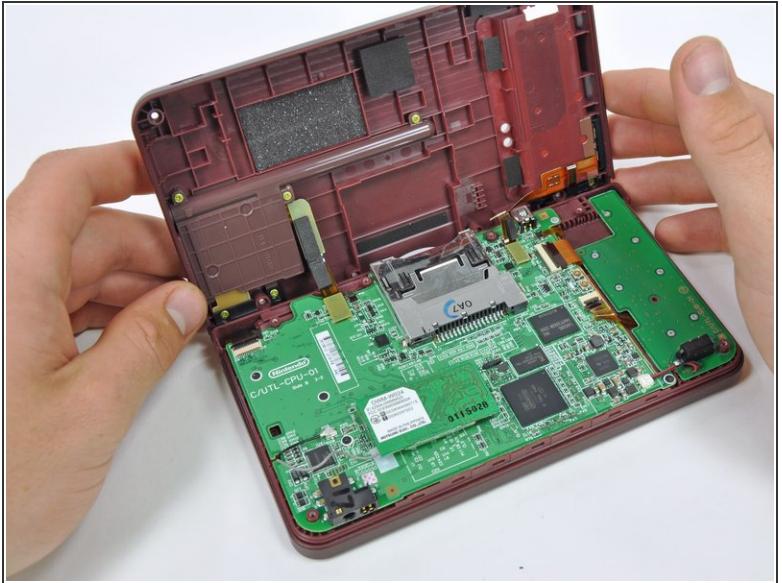

## Step 5

*(i)* Turn the DSi XL over, and open the display.

- Insert a spudger between the upper and lower case at the bottom left corner of the DSi.
- Slide the spudger along the bottom edge of the upper case to release the latches securing the upper case to the lower case.

## Step 6

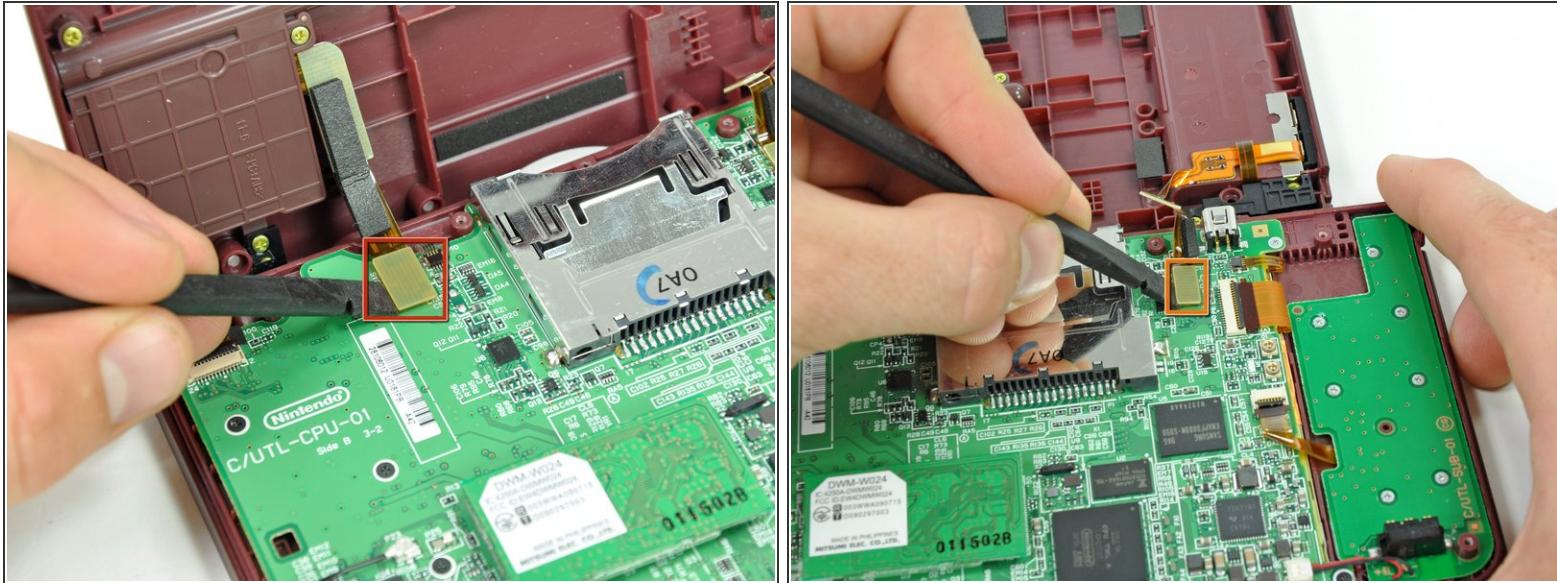

*(i)* Close the display and turn the DSi XL over.

- Lift the lower case from the front edge.
- Rotate the lower case away from the DSi.

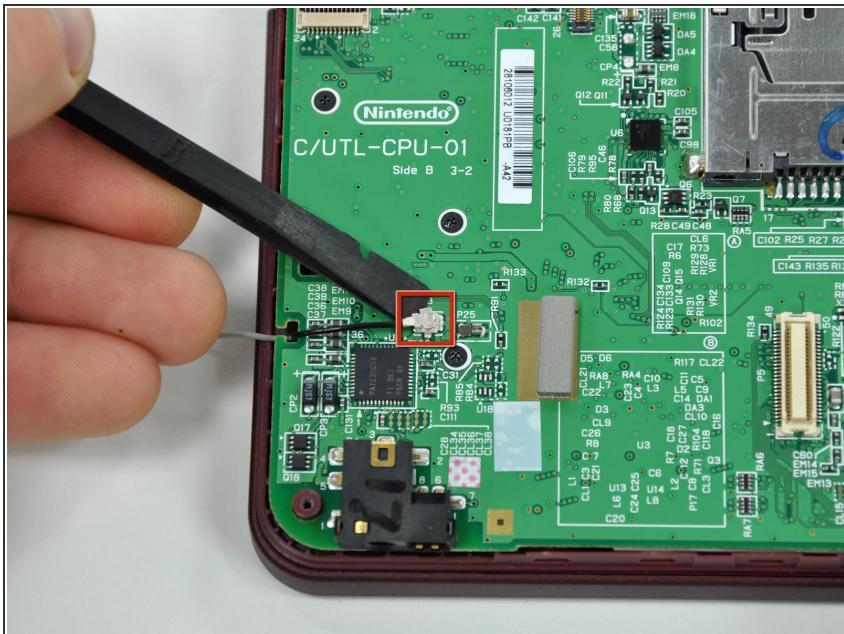

*(i)* The lower case cannot be completely removed yet, since it is still connected to the motherboard.

## Step 7

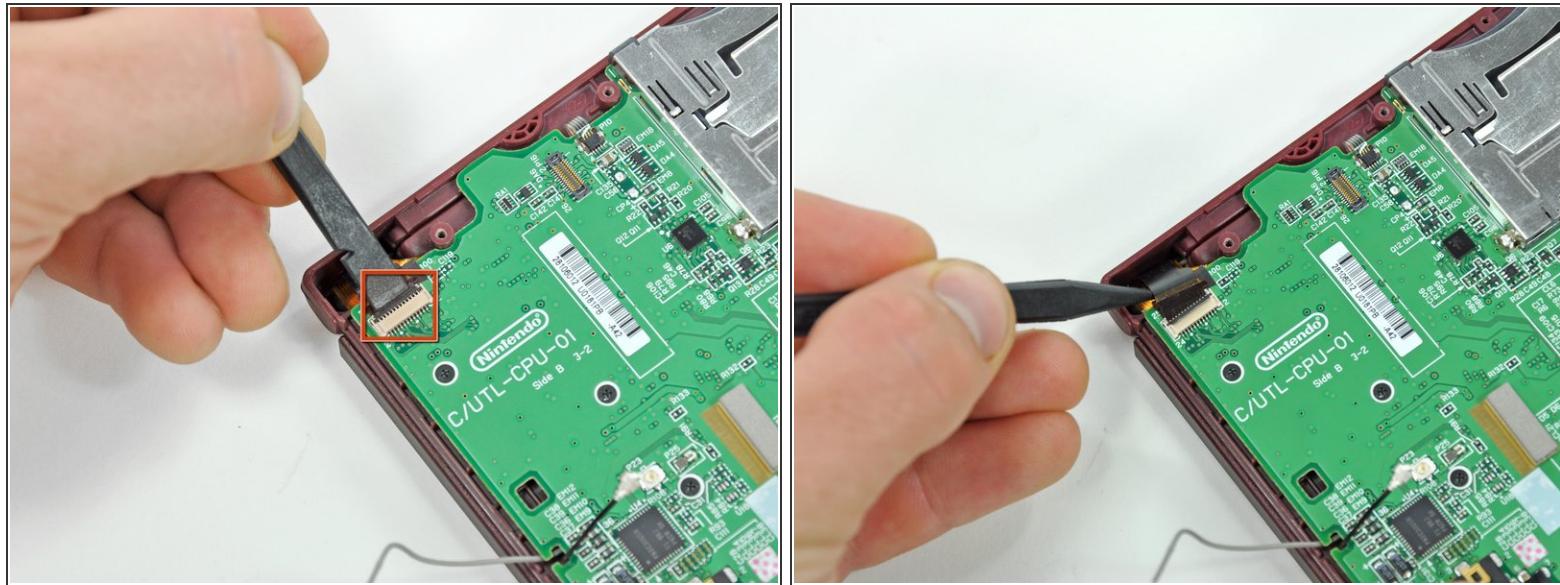

- Using a spudger, pry the SD card/right shoulder button connector off its socket.
- Pry the volume button/left shoulder button connector off its socket on the motherboard with a spudger.

## Step 8 — Motherboard

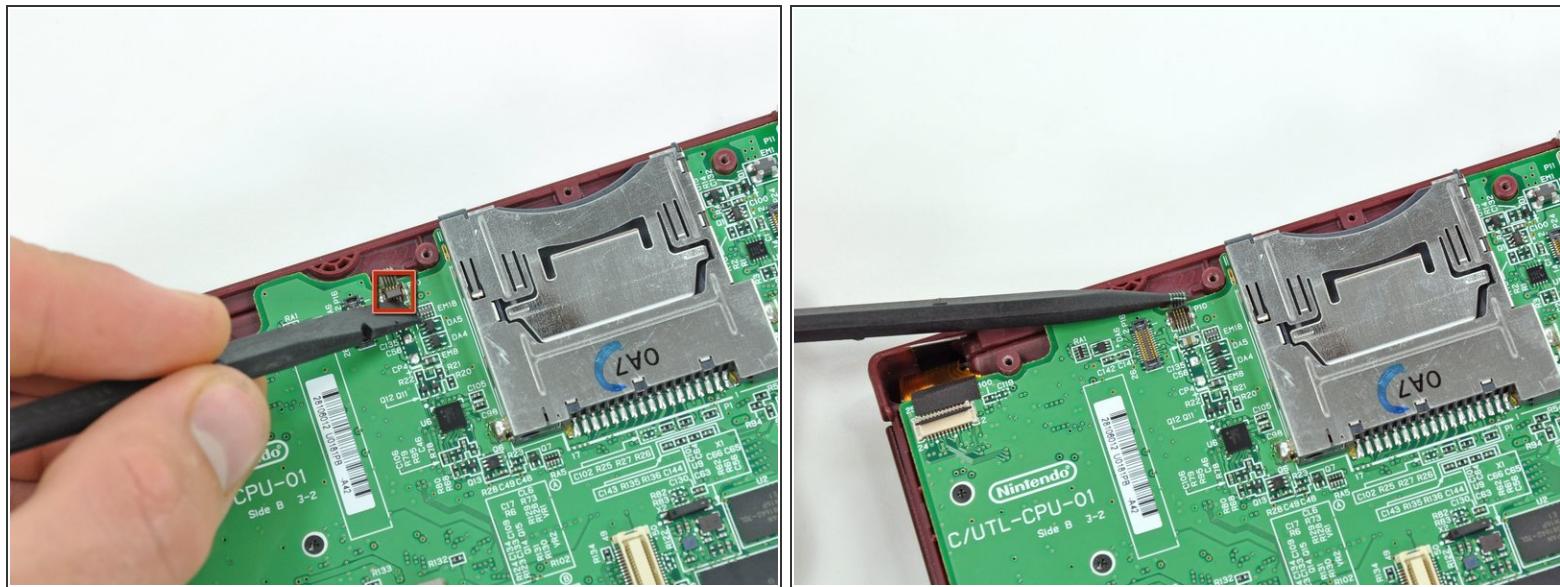

- Use a spudger to pry the microphone cable off the motherboard.
- *i* Pry from underneath the cable.

## Step 9

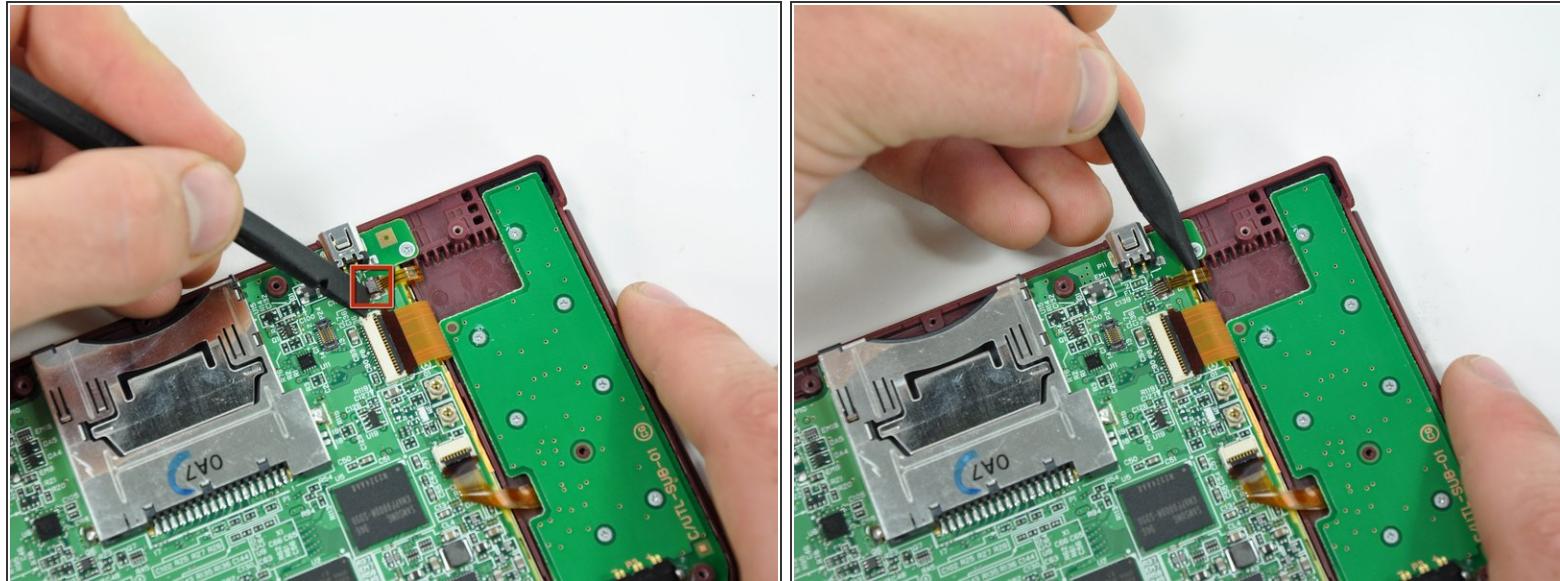

- Using the flat end of a spudger, flip up the retaining flap on the camera ribbon ZIF connector.
- Use the pointed end of a spudger to pull the camera ribbon from the ZIF connector.

## Step 10

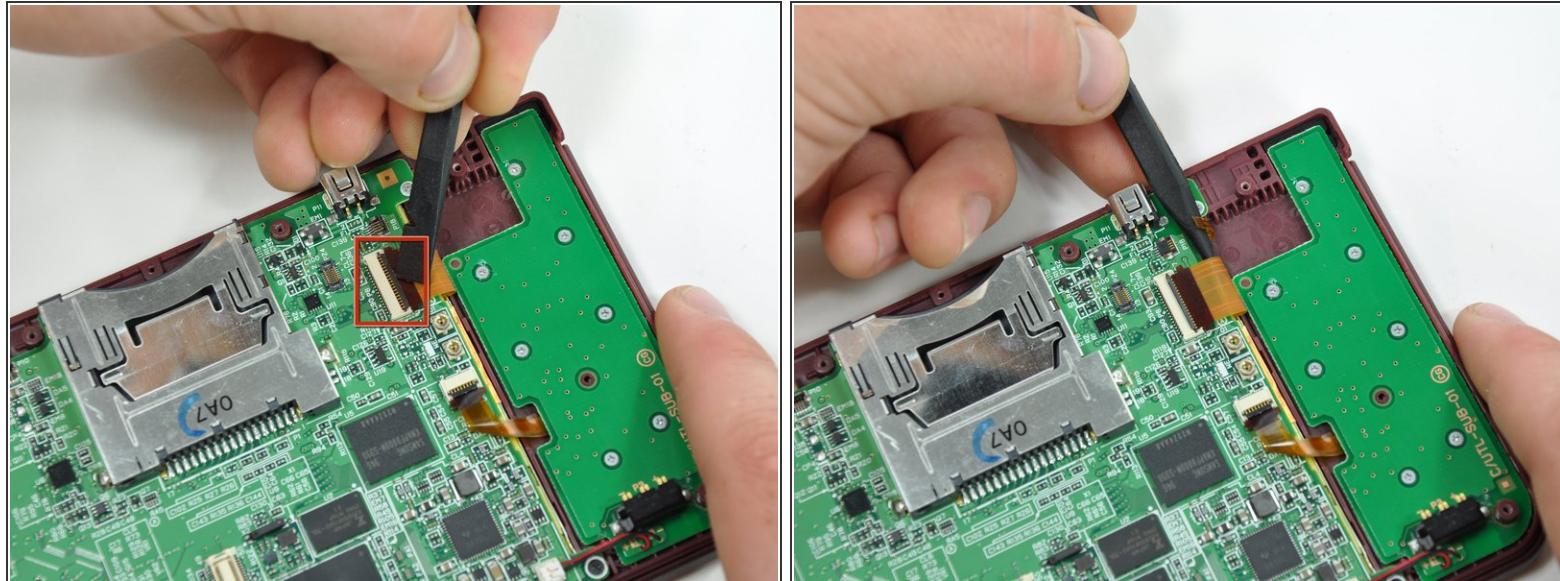

- Using the flat end of a spudger, flip up the retaining flap on the touchscreen cable ZIF connector.
- With the pointed end of the spudger, pull the touchscreen cable from its connector on the motherboard.

## Step 11

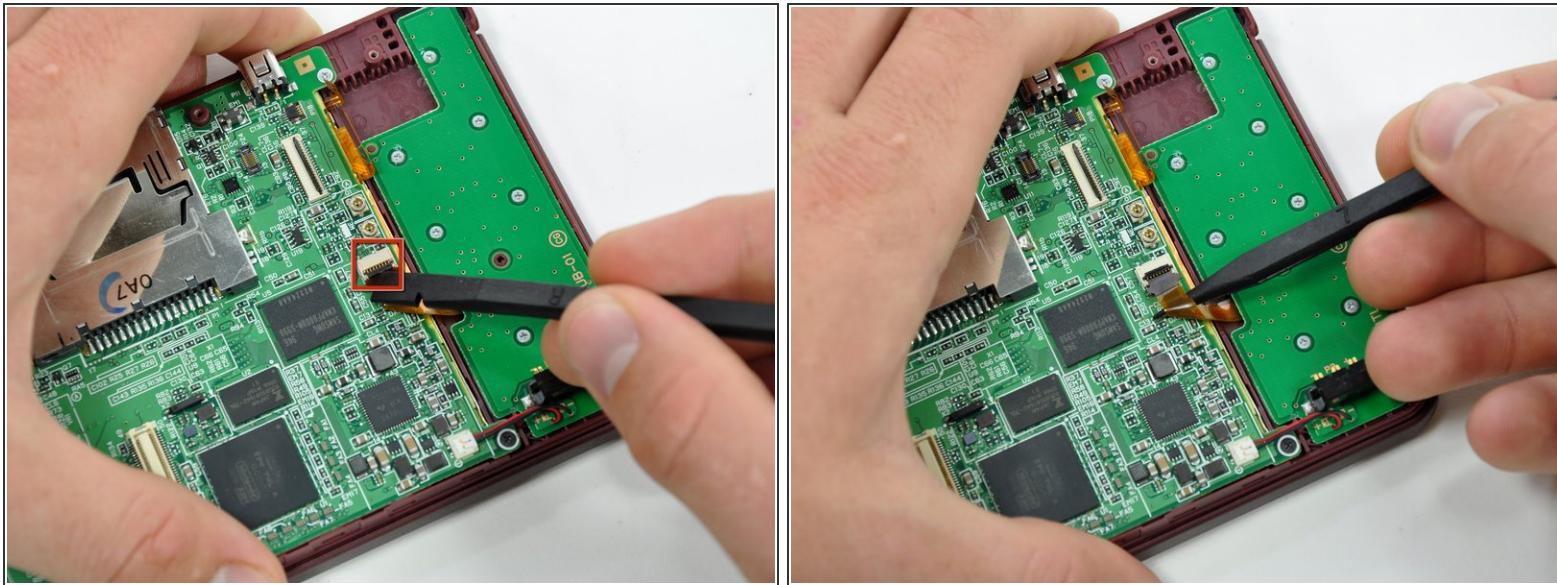

- Using the flat end of a spudger, flip up the retaining flap on the backlight cable ZIF connector.
- With the pointed end of the spudger, pull the backlight cable from its connector on the motherboard.

## Step 12

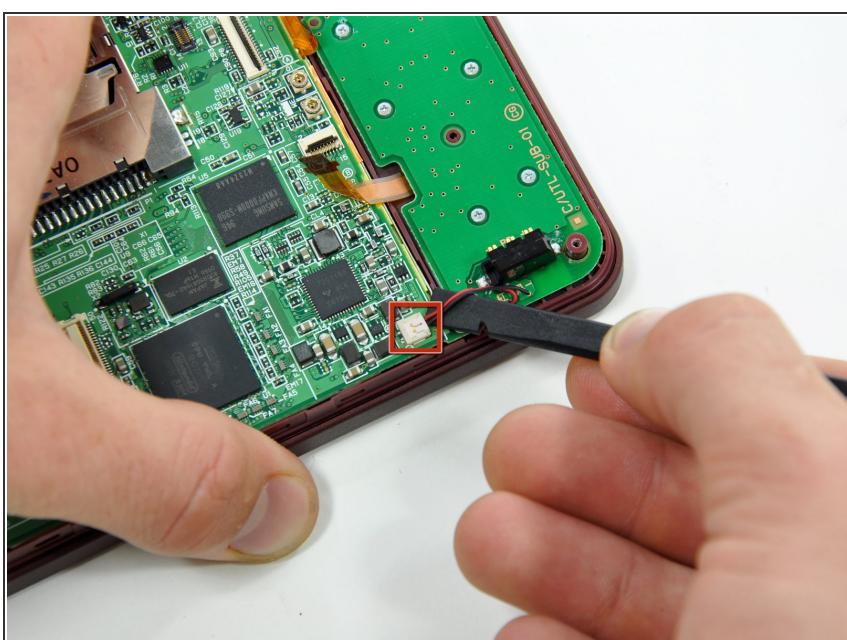

- Using the flat end of a spudger, flip up the retaining flap on the lower display data cable ZIF connector.
- With the pointed end of the spudger, pull the lower display data cable from its connector on the motherboard.

## Step 13

- Using the flat end of a spudger, flip up the retaining flap on the ZIF connector for the D-Pad/power button cable.
- With the pointed end of the spudger, pull the D-Pad/power button cable from its connector on the motherboard.

## Step 14

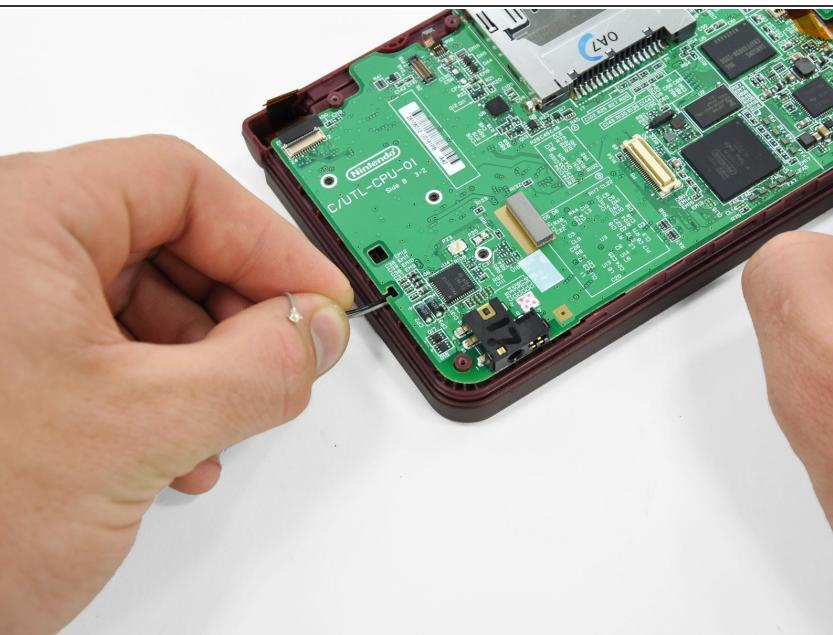

- Using the flat end of the spudger, pry the battery cable up off its socket on the motherboard.

## Step 15

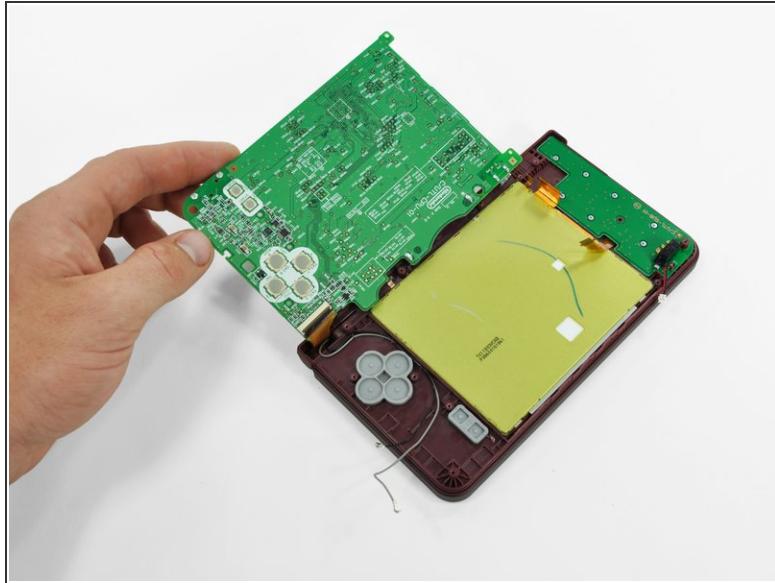

- Remove the screws securing the motherboard to the upper case:
  - A single 2.5 mm silver Phillips screw
  - Four 3.7 mm black Phillips screws

## Step 16

- Deroute the microphone and antenna cables through the slot in the motherboard.

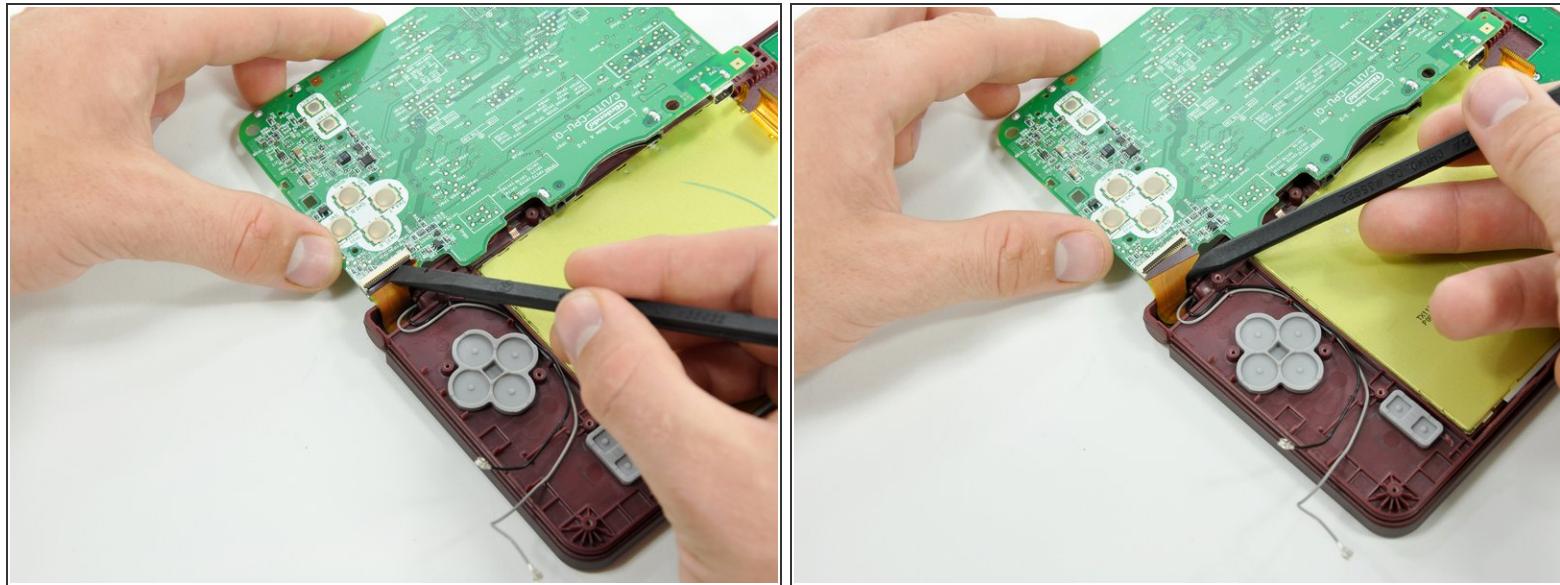

## Step 17

- Rotate the motherboard off the lower case.

*(i)* The motherboard cannot be completely removed yet. It is still attached by the upper LCD's display data ribbon cable.

## Step 18

- Using the flat end of a spudger, flip up the retaining flap on the upper display data cable ZIF connector.
- With the pointed end of the spudger, pull the upper display data cable from its connector on the underside of the motherboard.

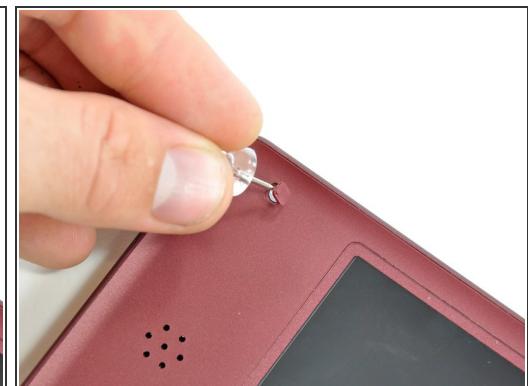

**(i)** The motherboard is now free from the upper case.

## Step 19 — Lower Display Assembly

- With the console still upside-down, open the DSi XL slightly.
- Push the lower display away from the upper case.
- Remove the lower display from the DSi XL.

## Step 20 — Rear Bezel

- Turn the DSi XL over and open the display.
- When re-assembling the device, be sure to re-install the ABXY and Start/Select buttons, as they are likely to fall out once the handheld console is turned over.
- Use a pushpin to remove the four plastic screw covers on the front bezel.

## Step 21

- Remove the four 3.5 mm silver Phillips screws securing the rear bezel to the front bezel.

## Step 22

- Using two hands, gently slide the rear bezel upwards.
- (i)* The rear bezel will move only about 2 mm.

## Step 23

- Insert a spudger into the gap between the front and rear bezel.
- Rotate the spudger away from the DSi XL, prying the two bezels apart.

## Step 24

- In the same manner as described above, continue prying along the top edge of the front and rear bezels.

## Step 25

- Separate the rear bezel from the front bezel.

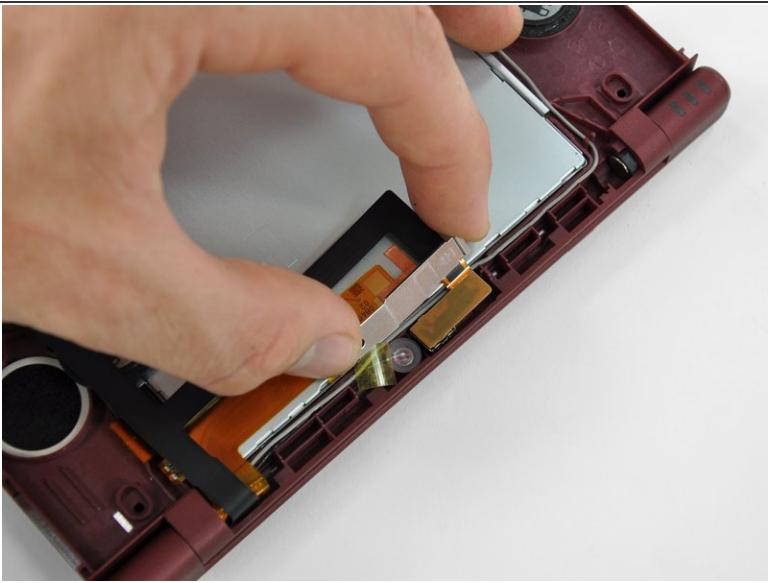

**⚠** Do not attempt to completely remove the rear bezel yet. It is still attached to the front bezel by the rear-facing camera.

## Step 26

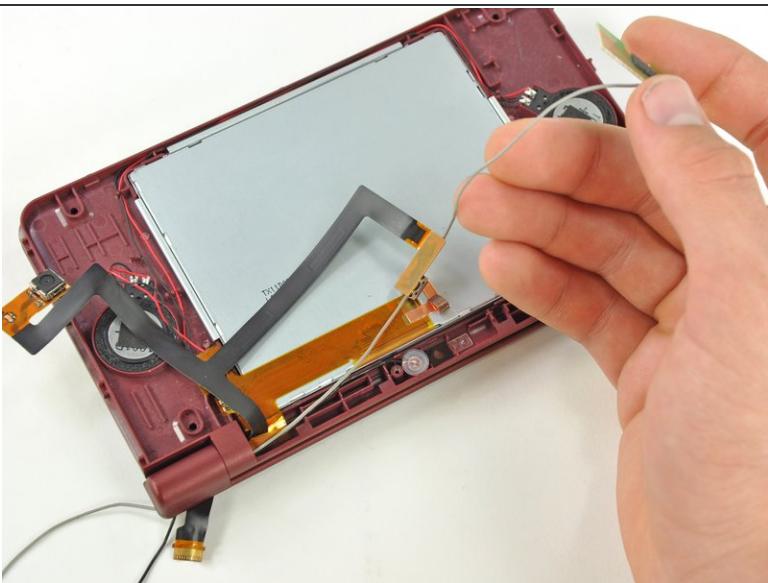

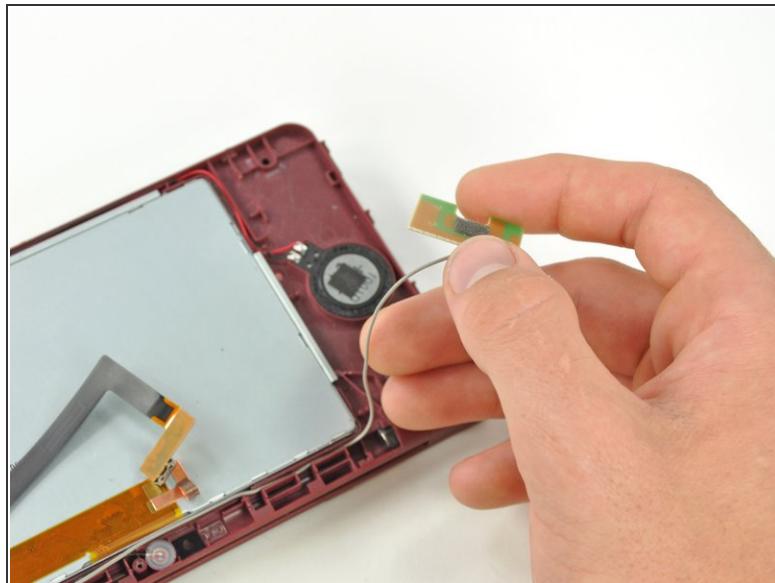

- Using the flat end of a spudger, pry the rear camera off the rear bezel.
- Remove the rear bezel.

## Step 27 — Wi-Fi Antenna

- Remove the Phillips screw holding the metal securing bracket in place.
- Lift the metal bracket off the camera.

## Step 28

- Lift the Wi-Fi antenna off the front display bezel.
- De-route the Wi-Fi antenna cable from its grooves at the bottom of the front display bezel.

## Step 29

- Pull the Wi-Fi antenna cable through the right hinge connecting the front bezel and upper case.
- Use the pointed end of a spudger to guide the connector at the end of the Wi-Fi antenna cable through the hinge.

 To replace the antenna, use a pair of tweezers to guide the connector through the hinge.

To reassemble your device, follow these instructions in reverse order.
