

Nokero N222-Huron O-Ring Replacement

Replacing the waterproofing seal on the clear cover.

Written By: Vinny Capone

INTRODUCTION

Keeping your device water-proof is paramount in using it to its full potential. Follow this guide to replace the water-proofing O-ring.

TOOLS:

- Spudger (1)

Step 1 — Clear Cover

- Grasp the clear cover and the white housing and twist the cover counter-clockwise.

i The lid may hold fast, but it will come off with some firm twisting.

Step 2

- Lift the lid from the device

i It may be helpful to use a spudger to pry under the lid if there is difficulty in getting a good grip on the smooth plastic.

Step 3 — O-Ring

- Using a plastic spudger, lift the o-ring from the lid

Step 4

- Gently stretch the new O-ring and place it in position on the clear cover. Make sure it is flush with the flange and not interfering with the locking threads

To reassemble your device, follow these instructions in reverse order.
