  - [T6 Torx Screwdriver](#) (1)
-

## Step 1 — Battery

- Be sure cell phone is off before you begin to disassemble the phone.
- Press the button on the bottom of the back of the cell phone.
- Slide rear panel down and remove it.

## Step 2

- Using your fingernail, pry the back of the battery upwards and pull out.

### Step 3 — Faceplate

- Insert the plastic opening tool under the faceplate.
- Separate the faceplate from main body by twisting the prying tool with some force.
- The faceplate is held by three plastic fasteners, so pry evenly on both sides of phone.

### Step 4 — Keypad

- With the faceplate removed, simply peel off rubber key pad and remove.

## Step 5 — Motherboard Assembly

- Locate and remove the six screws on the front of the phone using a T6 Torx.
- All 6 screws are 6.9mm long.

## Step 6

- After removing screws, lift the motherboard assembly straight off the cell phone body.

## Step 7 — Power Button

- With the motherboard and LCD unit removed, gently pull the power button out of its housing.

To reassemble your device, follow these instructions in reverse order.
