Step 1 — Front cover and keypad

- Remove the back cover with your fingers or with the eject tool which is included by Nokia.

- ⓘ *Don't forget to turn off your device!*

Step 2

- Remove the battery, the microSD card and the SIM card.

This document was generated on 2020-04-06 11:25:54 AM (MST).

Step 3

- Remove the 2 screws with the T4 screwdriver.

⚠️ *Please store the screws on a safe place! I already lost a screw!*

Step 4

- Take the metal spudger and pry it firmly under the plastic hinges.

⚠️ *Although you want to replace the cover, be very careful by doing it! You could harm yourself with the metal spudger.*

ⓘ **You could also use your fingers instead of the spudger to do it!**

Step 5 — Remove the keypad

- To remove the keypad, you should use the spudger to push the top clamps down a little bit while pressing your fingers against the inside of the keypad.

- The keypad should be loose at the top.

- To remove the bottom, just use a little bit of force to pull it off the front panel.

⚠️ *Just use a little bit of force.*

Step 6

- To assemble the new keypad, start at the upper half of the keyboard.

Step 7

- To reassemble the front, just click it in place (you hear a clicking noise).

- Now screw the T4 screws back into the holes.

- Now you put the microSD card, the SIM card and the battery back into your device.

- Now you can turn on your device.

You did it!
