# INTRODUCTION

Nokia Lumia 625 - how to remove / replace the back / rear bezel.

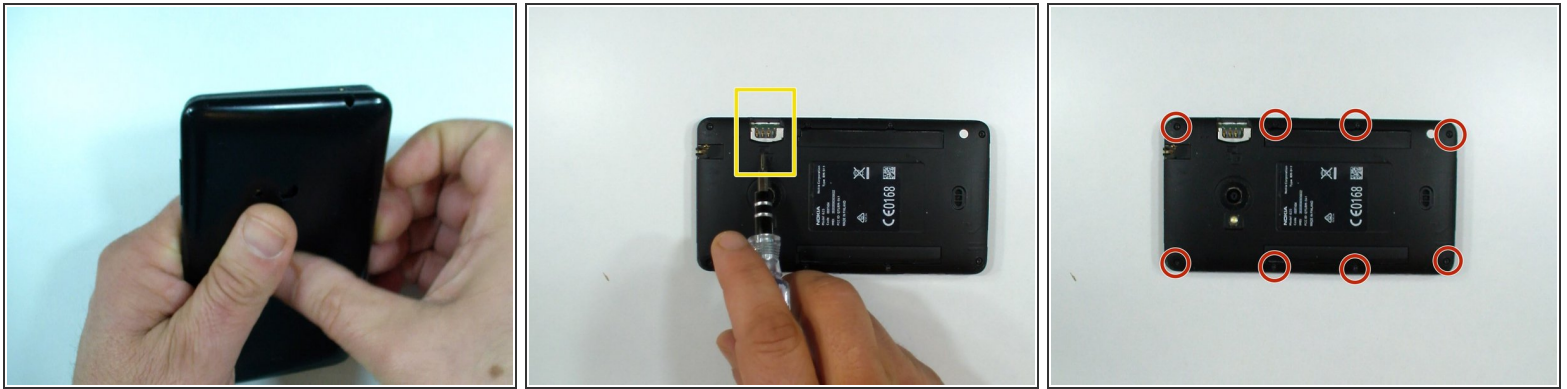

---

## TOOLS:

- [T4 Torx Screwdriver](#) (1)
  - [iFixit Opening Picks set of 6](#) (1)
-

## Step 1 — Rear Bezel

- Turn off the phone and remove the back cover.
- Remove any installed SIM or memory card.
- Use a screwdriver Torx T5 and remove the 8x black screws.

## Step 2

- At the top and bottom of the phone you'll see two grooves.
- Use a plastic tool and start separating the rear bezel from here.

To reassemble your device, follow these instructions in reverse order.
