### TOOLS:

- [T4 Torx Screwdriver](#) (1)
- [Tweezers](#) (1)
- [Spudger](#) (1)
- [iFixit Opening Tools](#) (1)
- [Heat Gun](#) (1)
- [adhesive tape 3 mm](#) (1)

### PARTS:

- [Lumia 535 Display Assembly](#) (1)

## Step 1 — BATTERY, SIM AND MEMORY CARDS

- Switch off the phone.
- Remove the battery and any installed SIM and memory cards.
- Remove the black tape near to the loudspeaker.

## Step 2 — SCREWS

- Remove the 9x Torx T4 screws.

*(i)* Two of them are with the same head size but with a different length.

## Step 3 — REAR COVER / BEZEL

- Use a plastic opening tool to remove the back cover.
- Careful unhook the display assembly flex cable.

## Step 4 — TESTING THE NEW SPARE PART

- Insert wisdom here.

## Step 5 — DISPLAY ASSEMBLY STEP 1

- Put some scotch tape to prevent the glass from scattering.
- Use a hot gun or hair dryer and warm the glass to soften the adhesive.

## Step 6 — DISPLAY ASSEMBLY STEP 2

- Start the separating from the upper right corner, where you have an hole in the middle frame.

⚠ Use plastic tool to prevent the middle frame from scratches.

⚠ Work slowly, you can cut your fingers.

## Step 7 — MIDDLE FRAME

- Clean the middle frame.
- Put adhesive tape 3MM.

**⚠** Be careful, don't cover the technological openings on the middle frame (for the light sensor, earpiece, etc.).

**(i)** It's easier if you order the spare part together with an adhesive tape.

- Install the display assembly.

## Step 8

- That's all.
