

Nokia Lumia 925 Speaker Replacement

This guide is to remove and replace a Nokia Lumia 925 speaker.

Written By: Guillermo Lara

TOOLS:

- [T7 Torx Screwdriver](#) (1)
- [T5 Torx Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Tweezers](#) (1)
- [ESD Safe Tweezers Blunt Nose](#) (1)

Step 1 — Motherboard

- Remove the sim card holder by inserting tweezers into the hole. Push down and the holder will spring back up.
- Pull out the holder until it is completely separate.
- ⓘ Something like a paperclip will work if there are no tweezers available.

Step 2

- Slide a plastic opening tool under the back cover.
 - Slide the tool around the outsides of the cover to fully dislodge the pins holding the cover to the phone.
- ⚠ Some pins are facing the opposite way from the others.

Step 3

- Remove the 3 screws using the T7 Torx screwdriver.
- Unclip the black tab connector.

Step 4

- Remove the silver metal cover.

Step 5

- Unclip the two orange tabs.
- Remove the four silver screws using the T5 Torx screwdriver.

Step 6

- Remove the motherboard by sliding tweezers between it and the back of the screen. Lift up.

Step 7 — Display

- Push the screen from the inside of the phone.
- Pull the screen off.
- ⓘ Slide the electronic strip through the small opening.

Step 8 — Speaker

- Locate the grey speaker/camera cover.
- Carefully remove the cover with either a pair of tweezers or your fingers.

Step 9

- With a pair of tweezers, gently remove the orange colored tab closest to the speaker.

To reassemble your device, follow these instructions in reverse order.
