🔧 TOOLS:

- iFixit Opening Tools (1)
- T5 Torx Screwdriver (1)

Step 1 — Back Cover

- Use the T5 Torx screwdriver to remove the two 3.8 mm screws located in the back right corner of the device.
Step 2

- Using a plastic opening tool, pry off the back cover by going around the device until the panel is completely detached.
Step 3 — Front Cover

- Use a T5 Torx screwdriver to remove the ten 4.0 mm screws lining the perimeter of the device.

Step 4

- Using the plastic opening tools, pry off the front panel of the device.

Step 5

- With your plastic opening tool, lift up on the connectors to disconnect them.

To reassemble your device, follow these instructions in reverse order.
