

# Nutri Ninja Ninja Blender Duo BL641 Blade Replacement

Replacing a dull blade in the Nutri Ninja Ninja Blender Duo BL641.

Written By: Charlotte

---

## INTRODUCTION

The blade can become dull and cease to work at maximum efficiency. This guide will show you how to safely replace the blade.

### PARTS:

- [Stacked Blade](#) (1)
-

## Step 1 — Blade

- ❗ Make sure blender is turned off.
- Lift open the lid of blender by pressing the "Release" button and move to the side

## Step 2

- Carefully Grab the top of the blade and pull upward with medium force.
- The blade should slide out easily.

 Do not touch the blades! Even when dull they can still cut you.

### Step 3

- Carefully pick up the new blade and match the bottom star shaped opening to the star shaped protrusion from the blender.

### Step 4

- Slowly connect the two star shapes together and push down until it reaches the bottom.

Now your blender can resume blending to perfection.
