

# OLPC XO-4 Touch Screen Replacement

Replace the display screen on the XO-4 Touch.

Written By: Zach Yasuda

## INTRODUCTION

Learn how to replace the display screen on the XO-4 Touch.

### TOOLS:

- Phillips #1 Screwdriver (1)

## Step 1 — Battery

- Turn the laptop upside-down, with the handle facing away from you.

## Step 2

- Pull the lock tabs towards the green outer edges of the laptop.
- Hold the left lock tab in the unlock position until the battery is completely removed in the next step.

## Step 3

- Lift up on the middle of the battery to remove it from the device.

## Step 4 — Screen Frame

- Remove the two 4mm Phillips #1 screws underneath the screen on the right-hand side.
- Rotate the screen 180° and remove the other two screws.

**(i)** You will have to put your screwdriver through the handle in order to reach the middle screw for both sides.

## Step 5

- Remove the green side panel by pressing down on the small green button on the top and sliding the panel up.
- Repeat the step above for the panel on the other side.

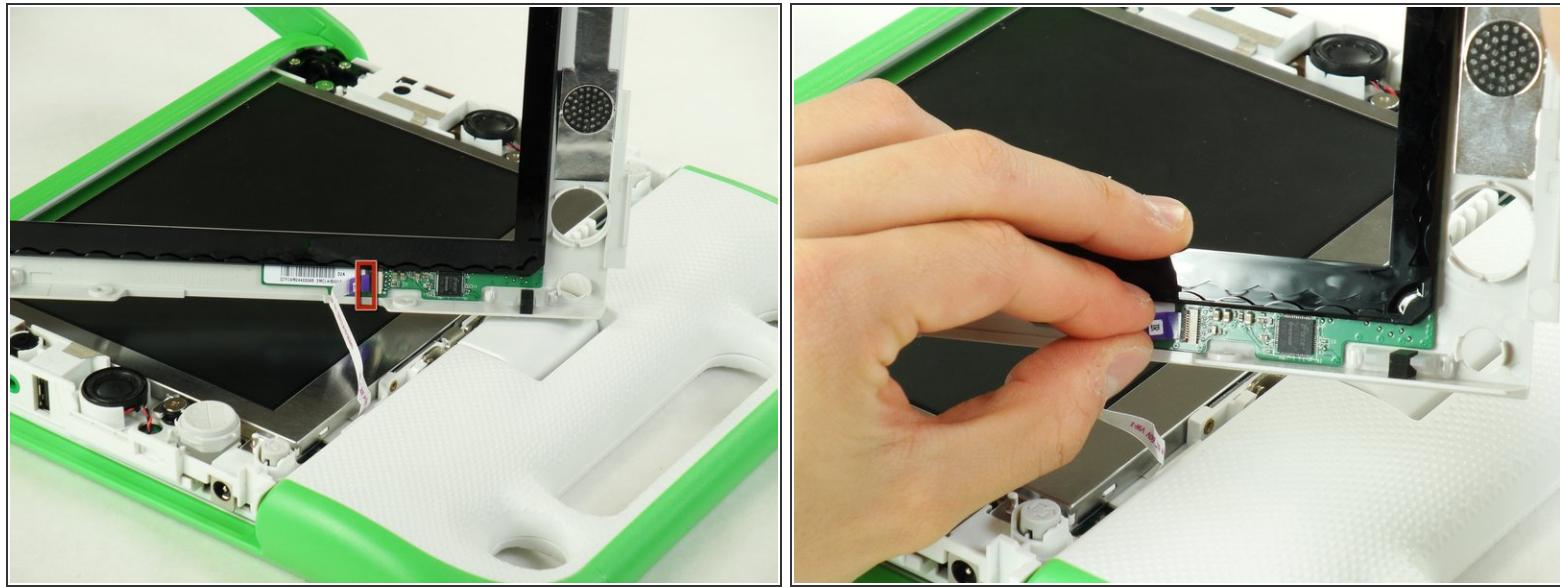

## Step 6

 Be careful not to pull the bottom too far out because a ribbon cable is under the frame and can easily break.

- Gently lift up the lower part of the frame and pull it down to free the screen frame.

## Step 7

- Lift the black connector and pull the ribbon cable out by the purple tab, freeing the frame.

## Step 8 — Screen

- Remove the four 7.62mm screws using a Phillips #1 screwdriver.

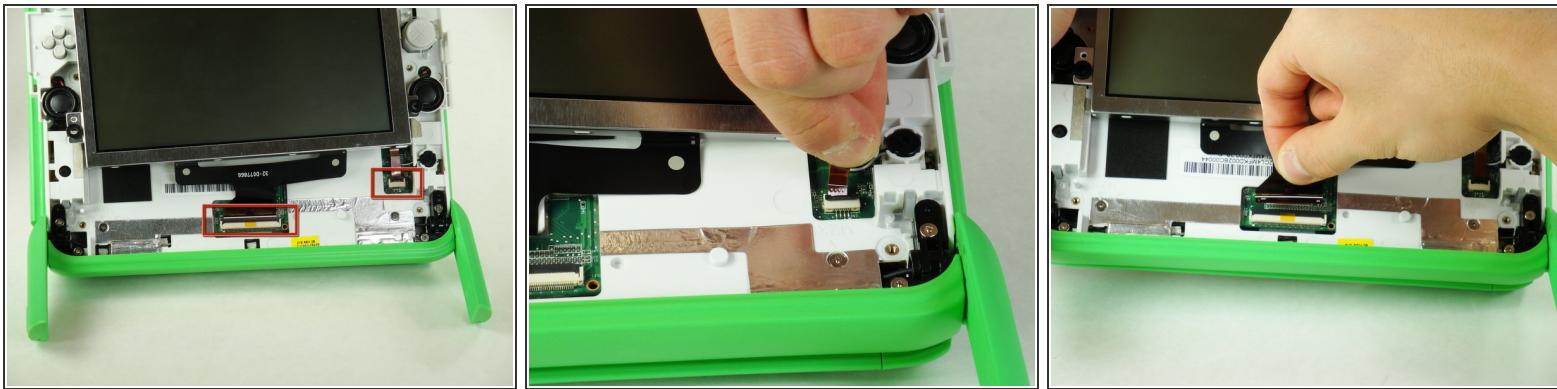

## Step 9

**⚠** Be careful not to pull the screen out too far. There are two ribbon cables attached to the screen, and they can easily break.

- Carefully lift the screen out.

## Step 10

**ⓘ** Notice that the laptop in this picture has been turned 180° with the antennas now below the screen.

- For each ribbon cable, lift up the black connector and gently pull the ribbon cables out by the plastic tabs.

## Step 11

- Remove the screen from the laptop.

To reassemble your device, follow these instructions in reverse order.
