INTRODUCTION

This guide will show clear and easy steps on how to replace the On/Off button.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

Step 1 — Locate On/Off Button.

- First sit the camera on its bottom. You will be working on the on/off button.

Step 2

- Place camera upward.
- You will notice two screws near the on/off button.
- Use your Phillips #00 screwdriver to unscrew the two screws.

Step 3

- After unscrewing the two screws near the on/off button you will notice a single screw to your right.
- Unscrew the single screw with your Phillips #00 screwdriver.
- This will allow you to pry the panel off.

Step 4

- Grab your plastic opening tool and start prying off the panel.

Step 5

- Once the panel is lifted you will want to lift up the cover for the on/off button.

 The actual on/off button is very small and loose so make sure to be careful with it!

Step 6

- You have reached the on/off button.
- You can now replace it!

To reassemble your device, follow these instructions in reverse order.
