

Optoma HD20 Color Wheel Replacement

Device image in black and white? Try replacing the color wheel.

Written By: Trever

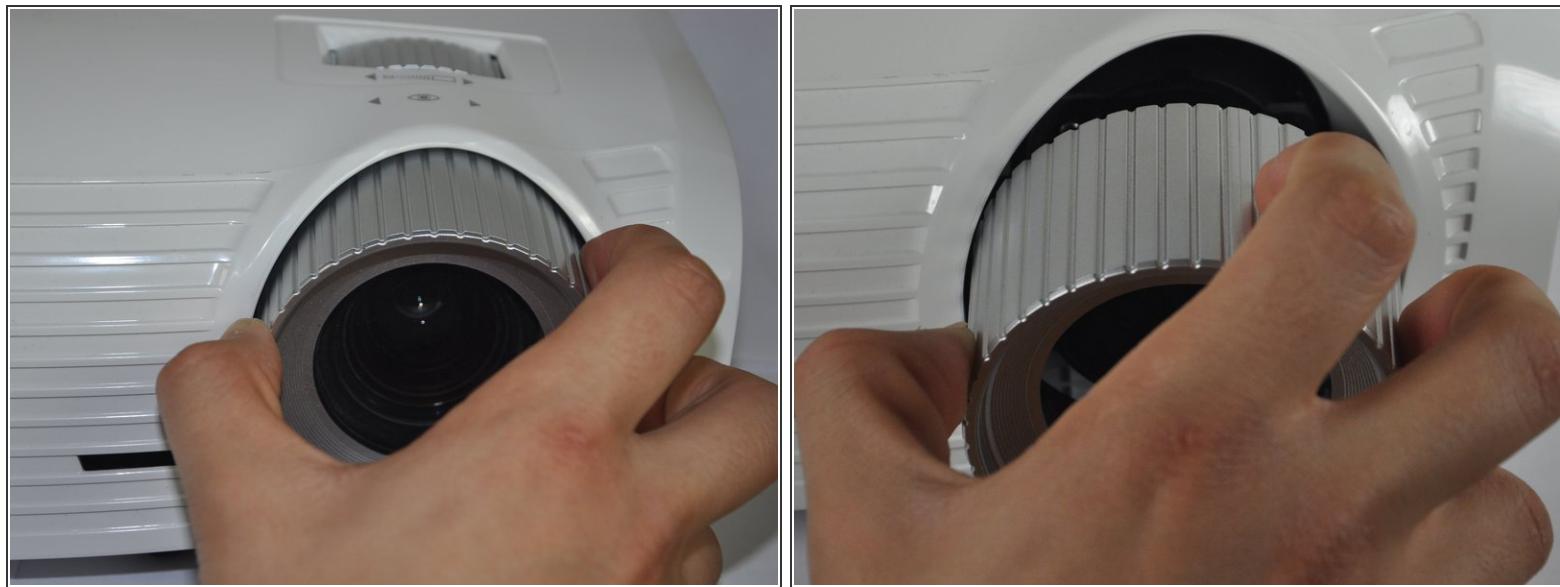

INTRODUCTION

Use this guide to remove the color wheel from your Optoma HD20.

TOOLS:

- [Phillips #1 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

Step 1 — Disassembling Optoma HD20 Cover

- Twist the focal cap clockwise until it is fully extended.
- Remove the focal cap by pulling it straight out.

Step 2

- Use a Phillips #1 screwdriver to remove the three 7.5mm screws on the bottom of the device.

Step 3

- Use a plastic opening tool to gently pry the top cover off of the device.
- *i* It is easier to pry off the cover from the back side just above the HDMI ports.

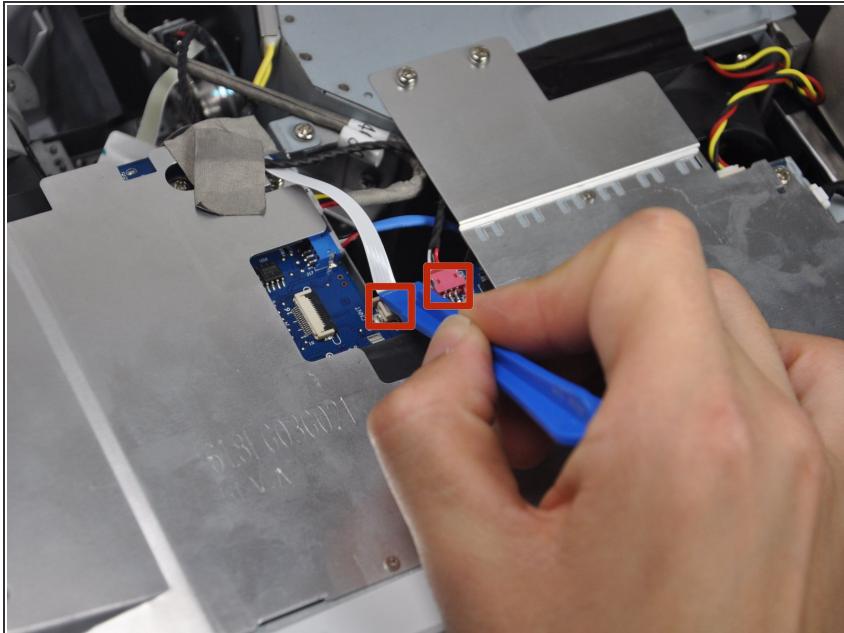

Step 4

⚠ When removing the cover, be cautious of the ribbon connecting the top buttons to the main circuit board. The ribbon must be disconnected before proceeding.

- Remove the ribbon by disconnecting it from the main circuit board.
- Lift up the clip holding it down and pull the ribbon out.

Step 5 — Color Wheel

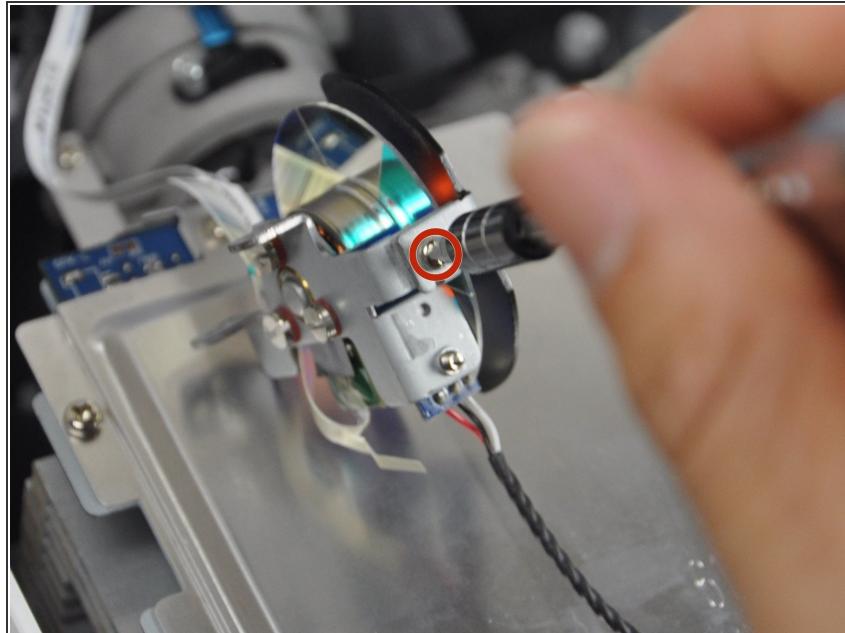

- Use the plastic opening tool to remove the wiring.

Step 6

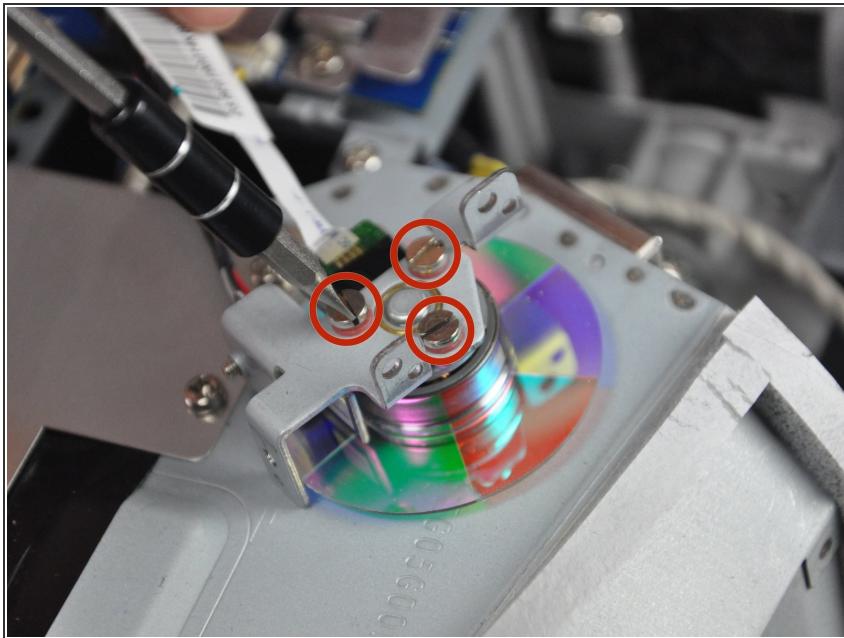

- Use a Phillips #1 screwdriver to remove the 5.5 mm screws around the pin wheel.

Step 7

- Use a Phillips #1 screwdriver to remove 1 more 5.5 mm screw.

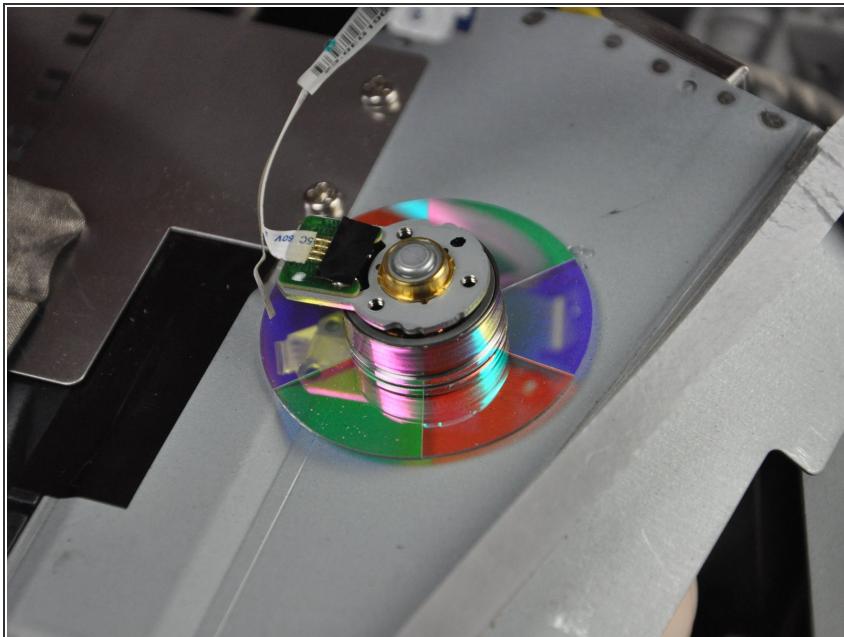

Step 8

- Using a flat head screw driver unscrew the back part to release the color wheel.

⚠ Do this carefully because these screws do not pull out.

Step 9

- Once unscrewed, remove the color wheel, and replace the part.

To reassemble your device, follow these instructions in reverse order.
