INTRODUCTION

Use this guide to replace a jammed or broken power button in the Oregon Scientific Meep! X2 tablet.

🔧 TOOLS:

- Tweezers (1)
- Soldering Iron (1)

Step 1 — Rear Casing

- Remove the orange covers from the left and right sides of the device by sliding up against the tabs.

Step 2

- You can remove the rear casing by unscrewing all six phillips #00(3.5mm x 4.5mm)screws from the left and right side of the device.
Step 3

- Use the plastic opening tools to undo the clips around the edges of the device.

Step 4 — Power Button

- Use a tweezer to gently pull the power button sensor out of the case's slot.

Step 5

- Use the soldering station to unsolder and remove the power button from the motherboard.

- In the case of screen or screen sensor replacement, disregard desoldering steps.

To reassemble your device, follow these instructions in reverse order.
