

# Osram Lightify Disassembly

This guide shows how to disassemble the Osram Lightify gateway.

Written By: Aiden Baker

# INTRODUCTION

This guide shows how to disassemble the Osram Lightify gateway.

## TOOLS:

- [Metal Spudger \(1\)](#)
- [T9 Torx Screwdriver \(1\)](#)
- [Tweezers \(1\)](#)

## Step 1 — Osram Lightify Disassembly

- Remove the front using a metal spudger.

*(i)* Once you can get your fingers in, remove the rest using your hand.

## Step 2

- On the back of the front cover, remove the white plastic using a metal spudger.
- Remove the PCB using a spudger

## Step 3

- Once the PCB is removed, use a Torx T9 screwdriver to unscrew and remove the power supply.
- Remove the screws holding on the back cover with a Torx T9 screwdriver and remove the back cover.

*(i)* all the screws are the same. they can be mixed with no problem.

## Step 4

- Remove the button by grabbing the tab over the button and pulling it out.  
*(i)* it will not come out if the button is not depressed.
- Remove both metal sheets. when its at an angle, push it in a little and then pull it up so that it is pointing straight up. then, you can push it through.

To reassemble your device, follow these instructions in reverse order.
