## Step 1 — Battery

- Remove the battery cover by pressing on the small rectangular button located on the back of the phone.
## Step 2

- Remove the battery by pulling it out towards you.

## Step 3 — Back Panel

- Remove the stylus in order to access the screw.

- Remove the 27mm top-left screw using a T6 Torx screwdriver.

## Step 4

- Using the spudger, remove the rubber rectangular cover located in the upper rear, right-hand corner.

- Remove the 27mm screw using the T6 Torx screwdriver.
  - ⓘ If there is a red Palm sticker covering this screw, puncture it to access the screw.

## Step 5

- Remove the remaining two 27mm screws from the bottom using the T6 screwdriver.

## Step 6

- Turn the phone so the screen is facing the right side.

- Use a spudger to carefully separate the back panel from the front panel to access components inside the phone.

- Separate the covers from the left side of the device as indicated in the picture.

  ⚠ The right side contains orange ribbons that are easily damaged.

To reassemble your device, follow these instructions in reverse order.
