

# Panasonic DVD-RV31 Player Right Function Board Replacement

Removing the function board.

Written By: Kevin

---

## INTRODUCTION

Use this guide to remove the right function board from the front panel of the DVD player.

---

### TOOLS:

- [Phillips #2 Screwdriver](#) (1)
-

## Step 1 — Disk Tray Cover

- Eject the disk tray from the DVD player before removing power supply.

## Step 2

- Evenly lift upward on the disk tray front cover (not slanted, as pictured). This will allow for easier dissassembly of the player.

## Step 3 — Outer Case

- Remove 3 screws running along back edge of case cover.
- Remove 2 screws from each side of case cover.

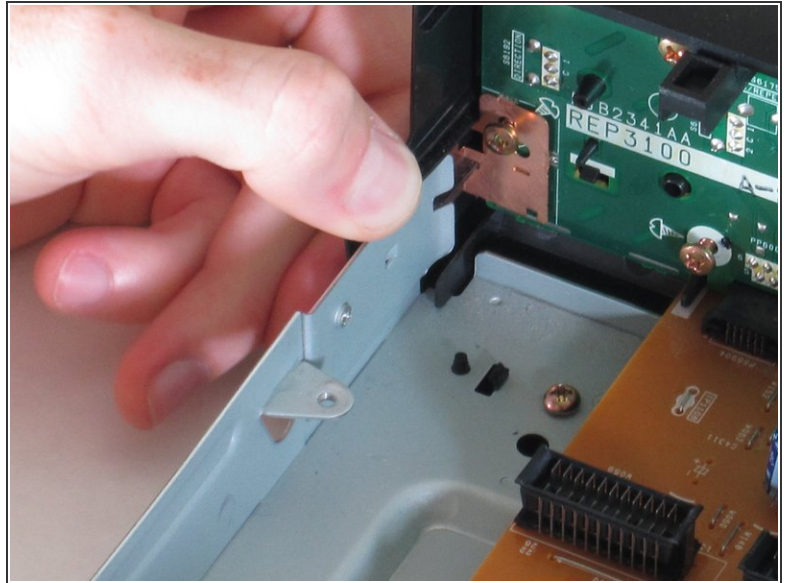

## Step 4

- Grab edges of cover, pull outward slightly, and pull straight up.

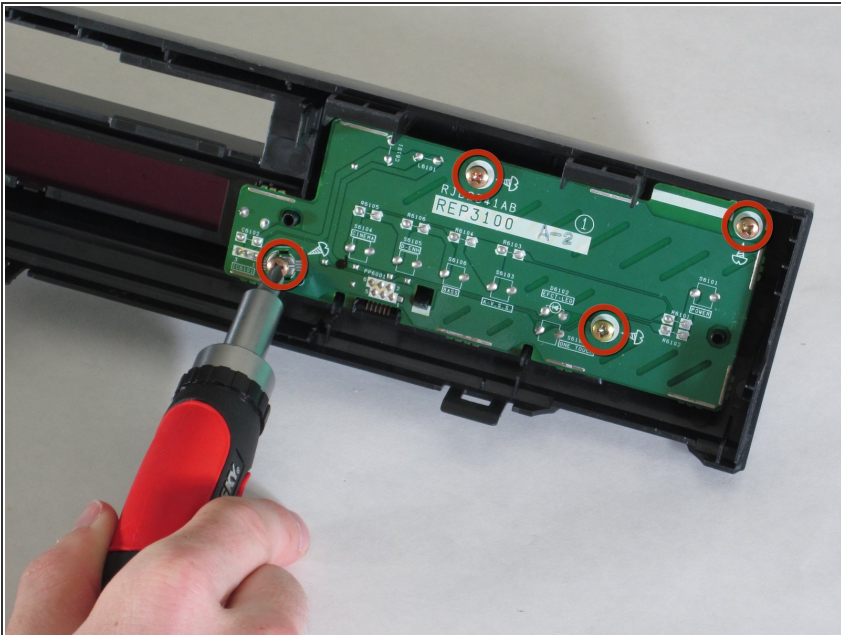

## Step 5 — Front Panel

- Lift up the 5 tabs securing the front panel to the chassis. There are 3 on the bottom, and 2 on the inside edges of the panel. Panel should then lift off the player.

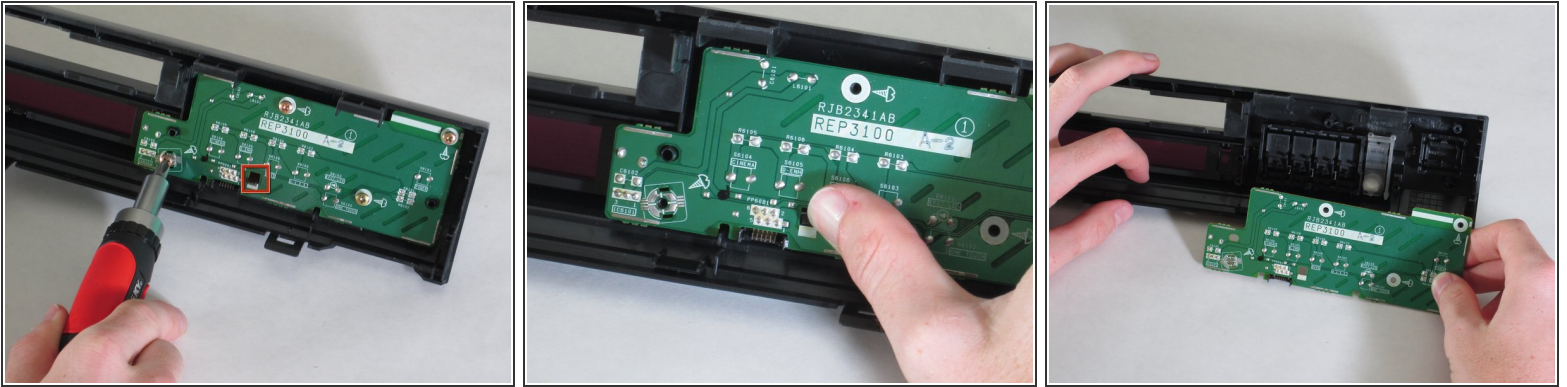

## Step 6 — Right Function Board

- Remove 4 screws as shown.

## Step 7

- Push in plastic retainer tab on board.
- Grasp edges of board and pull out.

To reassemble your device, follow these instructions in reverse order.
