Step 1 — Battery

- Move the switch on the battery door to the Open position.

- (i) The door will automatically swing open after you let it go.

Step 2

- Push the small gray tab on the top right corner to the left. The battery will pop out slightly.

- Keep your finger clear of the battery when it pops out.

Step 3 — Memory Card

- Push the memory card in and let go.
- (i) The memory card will pop out slightly.
- Pull out the memory card.

Step 4 — Back Cover

- Unscrew the small screws on the sides of the camera.
- (i) The screws on the left side(#00P, 4.7mm) are longer than the screw on the right side(#00P, 3.3mm).

Step 5

- Unscrew the three small screws on the bottom(#00P, 3.3mm).
- ⓘ The bottom will fall off.

Step 6

- Lift up the bottom back cover by prying the bottom edge with the spudger.
- Gently lift up the back cover with your hand from the bottom to the top.

This document was generated on 2019-09-22 02:04:15 AM (MST).

Step 7

- Lift the tabs on the ZIF connectors.

- The ribbon cables should easily come out of the ZIF connectors.

Step 8 — Top Cover

- Using the spudger, pry off the top cover by gliding the spudger along the entire edge between the top cover and the front cover.
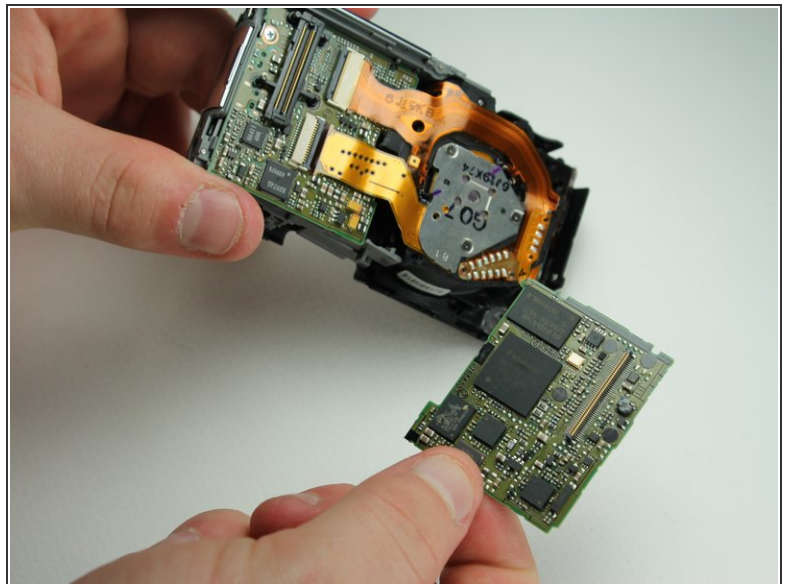

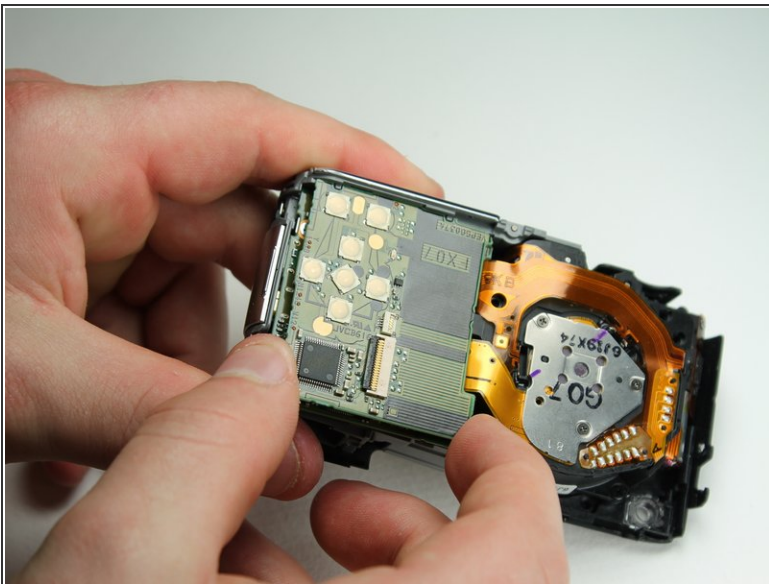

- ⚠ Be careful not to damage the cylindrical capacitor on the circuit board under the top cover.

Step 9 — Motherboard

- Remove the small screw in the hole towards the top of the camera(#00P, 5.4mm).

Step 10

- Use the spudger to lift up the back logic board.

- Using your fingers, gently wiggle and pull off the back motherboard.

- ⓘ You will hear a click when you lift it up.

Step 11

- Remove the small screw holding down the lower motherboard(#00P, 3.2mm).
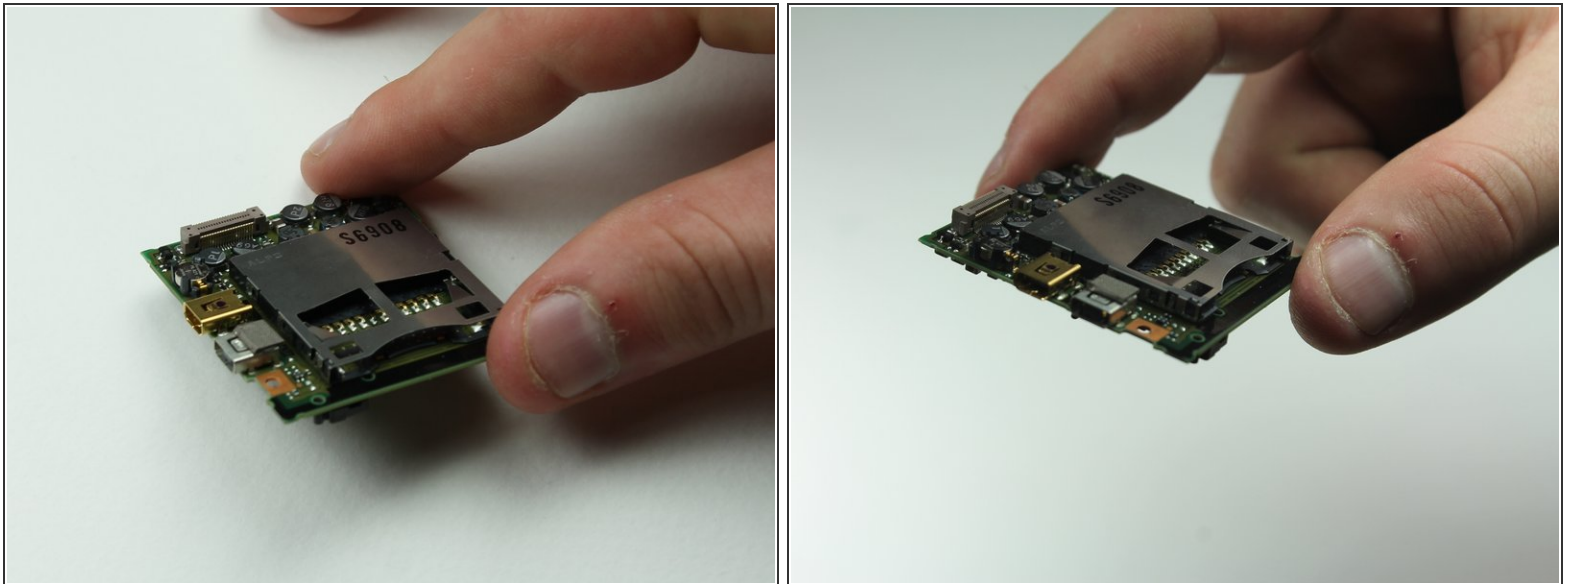

Step 12

- Use the spudger to lift the upper tab from the main housing.

- Gently lift the lower tab from the main body by prying it with your finger.

- Gently pull off the plastic motherboard housing sideways.

Step 13

- Gently lift the tabs on the ZIF connectors connecting the lens to the front motherboard.

- (i) Once you lift the tabs the ribbons should fall right out and the front motherboard should be free.

Step 14 — USB Port

- (i) The USB port is hardwired into this motherboard.

To reassemble your device, follow these instructions in reverse order.
