

# Panasonic Lumix DMC-TZ5 lcd screen replacement

Easily replace a broken LCD display with this easy to follow guide

Written By: Ben Canfield

 **TOOLS:**

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)

## Step 1 — Back Cover

- Remove the battery and memory card from the device.

## Step 2

- Remove 4 screws from the right side of the camera.
  - There are two 3.4mm screws at the top.
  - There are two 2.2mm screws at the bottom.

## Step 3

- Remove the single 3.4mm screw on the left side of the camera.

## Step 4

- Remove 5 screws from the base of the camera.
  - There are two 2.2mm screws next to the battery compartment.
  - There are three 4mm screws around the tripod mount.

## Step 5

- Slowly slide the back cover away from the device
- ⚠** The back casing is held in place by two ribbon cables. Do not pull the back cover too far from the camera.

## Step 6

- Detach both ribbon cables using a spudger.
- Use the tip of the spudger to lift the black clip upward, unlocking the ribbon cable.

## Step 7

- Remove the back casing from the camera.

## Step 8 — LCD

- Use a spudger to release the 3 clips between the LCD case and housing.
  - Put the tip of the spudger in the gap between the clip and housing, then lift up gently to unclip.
- Gently lift the LCD from the case, making sure none of the 3 clips reattach.

To reassemble your device, follow these instructions in reverse order.
