

# Panasonic Lumix DMC-ZS3 LCD Screen Replacement

Replace the LCD screen of your Panasonic Lumix DMC ZS3 camera.

Written By: Juan Pablo Quinonez Weston

## INTRODUCTION

Use this guide to replace the LCD screen which is housed in the camera's back cover.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)

## Step 1 — Back Cover

- Remove the following eleven screws securing the covers to the ZS3
  - Eleven 3 mm Phillips screws

**!** Using too much pressure when removing the screws may strip the screws and complicate screw removal at a later time.

## Step 2

- Use the flat end of a spudger to pry apart the back cover from the rest of the unit as shown.

**!** Be sure to carefully and slowly lift the back cover. Forcefully lifting the back cover and fully separating it at this point may ruin internal connections.

## Step 3

- Using your fingernail or a spudger, flip up the ZIF locking flap on the two LCD ribbon cable sockets that connect the back cover to the rest of the unit.

⚠ Be sure you are opening the locking tab, not pulling against the socket mounted to the board.

## Step 4

- Remove the two LCD board ribbon cables out of their sockets.

## Step 5 — LCD Screen

- Take the back panel and use the flat end of the spudger to pry the LCD screen from the back cover.
- ⓘ It may be necessary to wiggle the spudger a little it to loosen the adhesive that holds the LCD screen to the back cover.

**⚠** Be sure not to use excessive force in order to avoid damaging the components.

To reassemble your device, follow these instructions in reverse order.
