Step 1 — VHS Drive

- With the front display of the device facing you, rotate the device 90 degrees counter clockwise.

- Now rotate the device 180 degrees and remove the second screw.

- Remove the screw that is on the right side of the panel facing you.
 - All screws will need to be removed with a phillips head screwdriver.

Step 2

- Rotate the device so that the back faces you.

- With a phillips heat screwdriver, locate and remove the four screws highlighted by the red circles in image one.
