

Parrot Hydrofoil Orak Rudder Replacement

Your Parrot Hydrofoil rudder may be broken causing the drone to be uncontrollable in the water.

Written By: Justin Connerly

INTRODUCTION

This guide detail the replacement of the rudder on the Parrot Hydrofoil Orak. You may need to use this guide if you have a damaged rudder or if the boat is not traveling straight through the water.

TOOLS:

- [T8 Torx Screwdriver](#) (1)
-

Step 1 — Rudder

- Place the boat so that the front faces to the right.

Step 2

- Remove the far left 1cm screw using a T8 screwdriver.

Step 3

- Remove the rudder.

To reassemble your device, follow these instructions in reverse order.
