

Peavy 4 String Bass String Replacement

This guide will be short and simple, its going to show you what it should look like when replacing strings and where they set correctly on a bass.

Written By: Coby Anthony

INTRODUCTION

Howdy, this guide will help you the user replace your worn out and beaten down peavy bass strings. This is a simple yet useful guide that will give you a brief explanation on how to go about restringing a bass and the correct way of applying the new strings without confusion. Please follow this guide as closely as you can, id hate to have you ruin or snap a string on accident. Hope this helps anyone that needs it and rock on!

TOOLS:

- [Guitar Tuner](#) (1)
- [Guitar string winder and cutter](#) (1)

This is optional, you really only need a wire cutter to trim excess string length if needed

PARTS:

- [Bass Guitar Strings](#) (1)

Step 1 — Strings

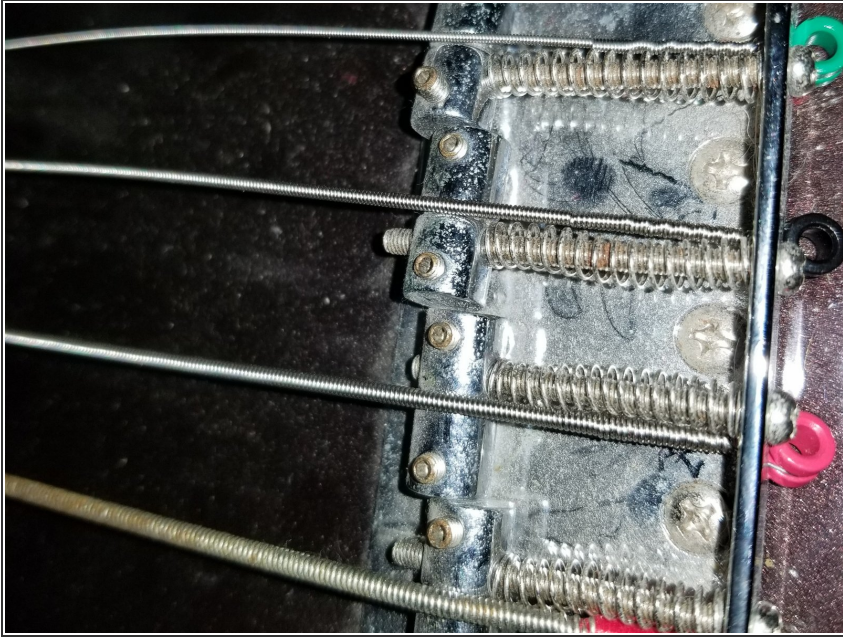

- Spin the pegs in the direction of the arrow to loosen the strings until they unwrap.
- ⓘ Repeat for all the other strings.

Step 2

- Unwrap your thickest string and begin placing the new strings in order of thickest to thinnest going from left to right.

Step 3

- Once all strings are unwrapped, thread the thickest string through the farthest left hole by the spring.
- ⓘ Repeat for the next three strings.

Step 4

- Begin wrapping the new strings around the tuner head and turn clockwise to tighten the strings.

Step 5

- Repeat step 6 for the three other strings.

Step 6

- Once all are tightened begin tuning each string with a phone tuner or guitar tuner and enjoy your fresh sounding bass!

In order to get your bass sounding brand new again follow these steps and you'll get a wonderful result
