

Pebble Time Battery Replacement

Removal of battery for replacement.

Written By: Nicolas Hempe

INTRODUCTION

Removal of battery for replacement.

TOOLS:

- [Metal Spudger \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Phillips #000 Screwdriver \(1\)](#)

Step 1 — Screen Cover

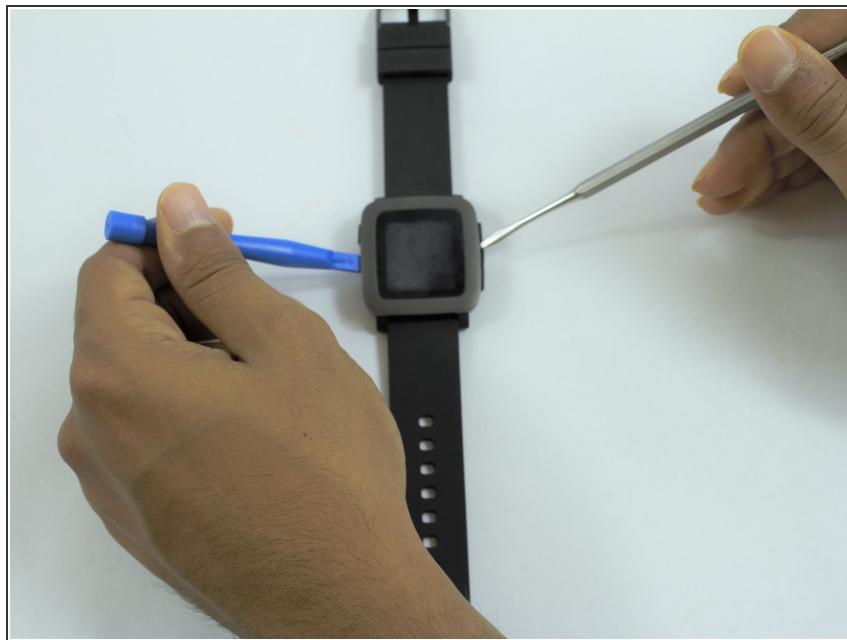

- Lay the watch flat on your workstation.

Step 2

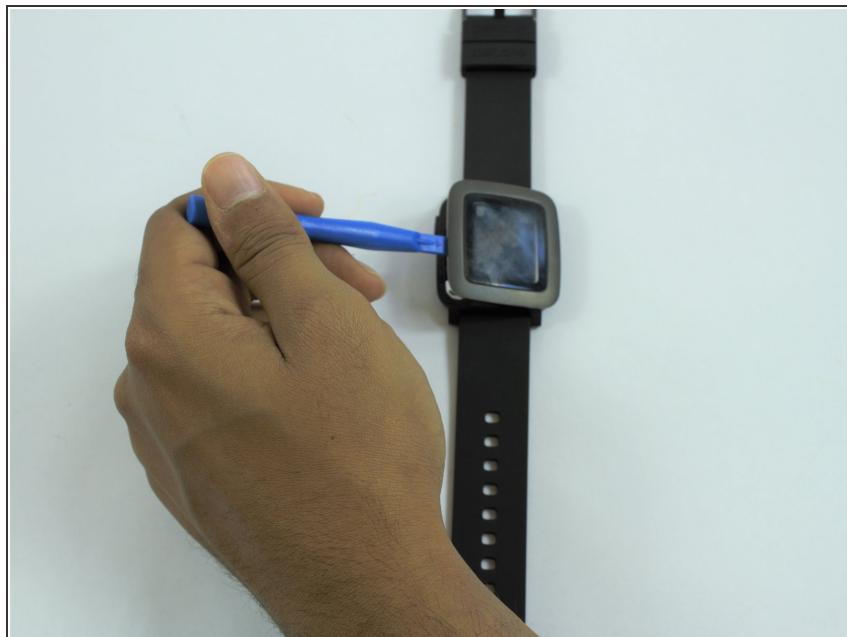

- Use the metal spudger to carefully pull apart the screen cover from the case.
- Replace the metal spudger with a plastic opening tool to hold the cover open.

Step 3

- Use the metal spudger tool to carefully loosen the rest of the cover.

Step 4

- Carefully, pull apart the cover with the plastic opening tool.

Step 5 — Screen

- Insert metal spudger into the side of the screen shown in the picture.

Step 6

- Use the metal spudger to pry the screen up.

Step 7

- Once screen is lifted, insert plastic opening tool between the screen connector and circuit board.
- Disconnect the screen from the circuit board.

Step 8 — Circuit Board

- Keep the watch flat on your workstation.

Step 9

- Locate the three screws on the circuit board.
- Remove using the J000 Philips head screwdriver.

Step 10

- Carefully disconnect the connector wire on the bottom left edge of the circuit board using a plastic opener tool.
- Move apart the connector to expose the fourth screw.

Step 11

- Remove the final screw from the circuit board with a J000 Philips head screwdriver.

Step 12

- Turn the watch to the side and use the plastic opening tool to lift up the circuit board.
- Remove the circuit board from the case.

Step 13 — Battery

- After removing the circuit board, the battery is located in the middle of the case.

Step 14

- Locate the battery connector on the left side of the case.
- Carefully disconnect the wire using a metal spudger.

Step 15

- After disconnecting the battery use the plastic opening tool to lift the battery off of the case.
- ⓘ The battery might be glued to the case.

To reassemble your device, follow these instructions in reverse order.
