

# Philips Satinelle Metal Rolling Tracks Replacement

This guide will show how to replace the metal rolling tracks of your Philips Satinelle.

Written By: Nathan Christian

## INTRODUCTION

If you need to replace the metal rolling tracks of your Philips Satinelle, use this guide.

### TOOLS:

- [Metal Spudger \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Large Needle Nose Pliers \(1\)](#)

## Step 1 — Philips Satinelle Disassembly

- Unplug the device and remove the purple guard.
- Remove the head by pressing the right side of the head (with the device facing away from you).
- You will hear a 'click' and the head will become dislodged from the body of the device.

## Step 2

- While wearing safety glasses, use a plastic opening tool to pry from right to left to pry out the tensor clip.
- Be careful not to lose the clip. It will likely fly off when it releases.

## Step 3

- The left side will swing down.
- Remove the Tweezers.

## Step 4

- Remove the plastic component that swings down.
- Use fingernails to lift clips from stubs.

## Step 5

- Using Needle Nose pliers remove metal roller track on both sides of the Tweezers Head.

## Step 6

- Use a spudger to pry the gear housing unit from the base.

## Step 7

- Use your thumbnail and a pair of needle nose pliers to push out the gear housing retention pin.

## Step 8 — Metal Rolling Tracks Replacement

- Replace Metal Roller Tracks on both sides of the Tweezer Head.

To reassemble your device, follow these instructions in reverse order.
