

# Phone Iphone 4 (CDMA/Verz) Rear Panel Replacement

Replacement Iphone 4 Rear Panel for (CDMA/Verz)

Written By: kempc8

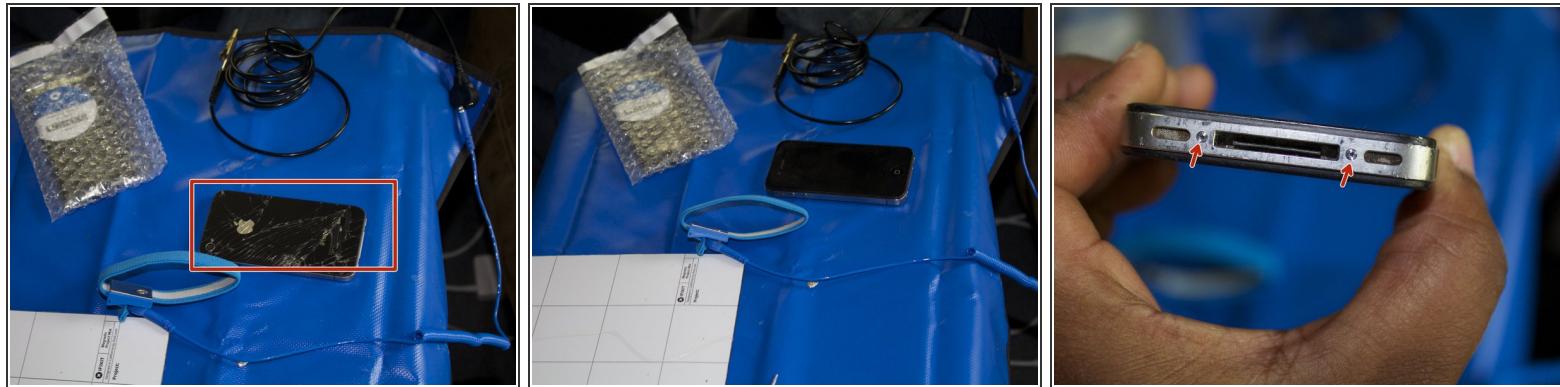

## INTRODUCTION

Replace back rear panel on Iphone 4 (CDMA/Verz)

### TOOLS:

- P2 Pentalobe Screwdriver iPhone (1)

## Step 1 — Iphone 4 (CDMA/Verz) Rear Panel

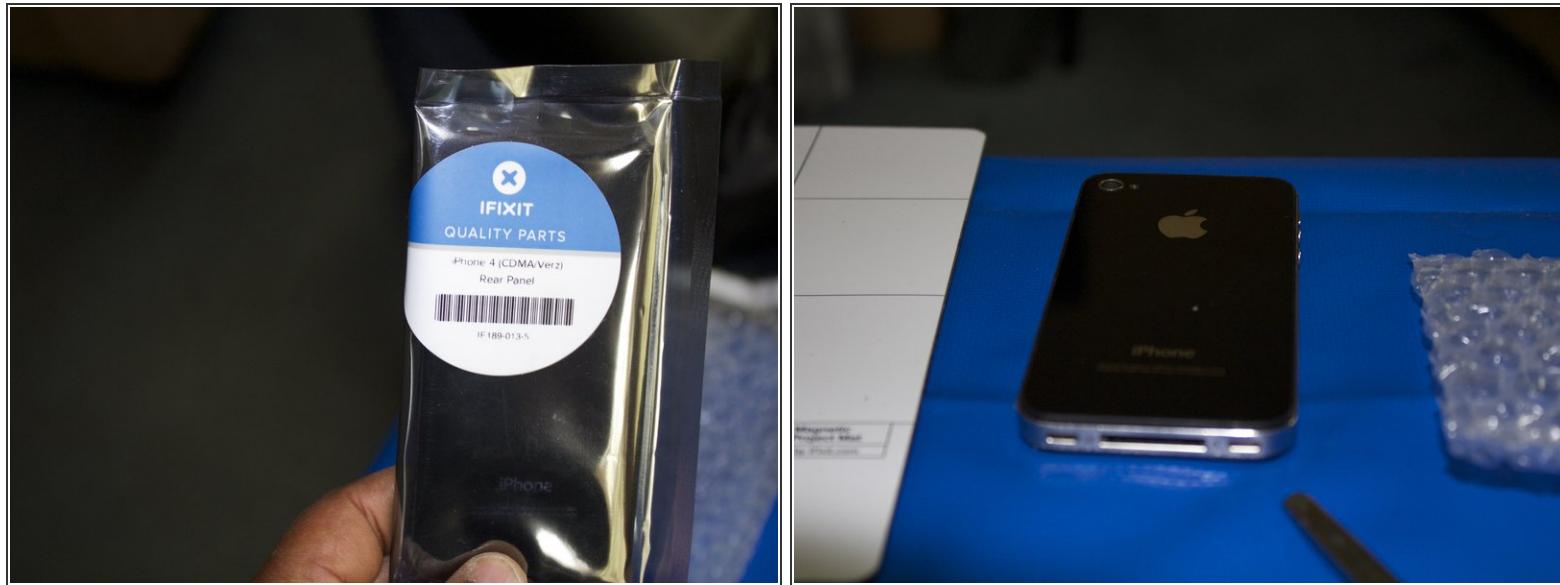

- Back rear panel for Iphone 4 for (CDMA/VERZ)

## Step 2

- We locate the two screws
- The two screws remove ( I use the I FixIT P2 screwdriver)
- Place the two to side on IFIXIT magnetic project mat . Because we need it for the new rear panel

## Step 3

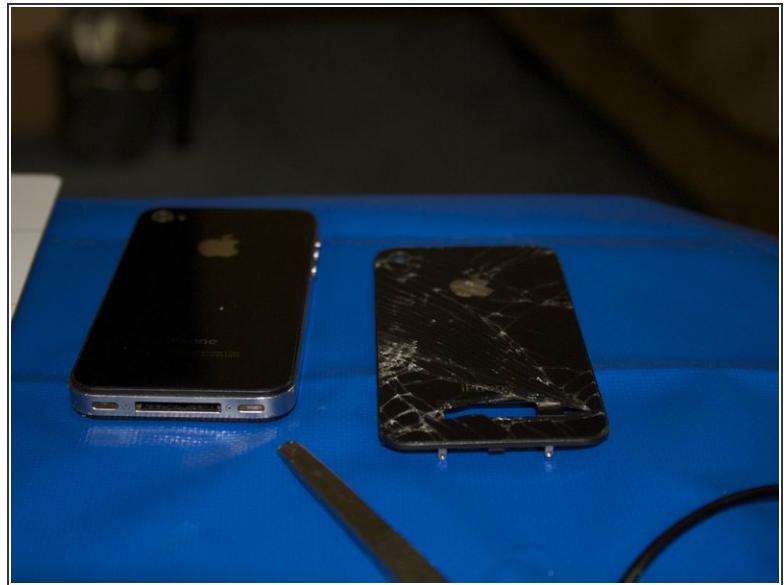

### *(i)* After removing screws

- Push forward on back panel and it should slide forward.
- Remove old panel

⚠ ( I keep all new parts from IFixIT in package in till I am ready for repair)

- I place back panel gently on the Iphone 4 . Slide the back panel down and screws both screws back in place . With P2 screwdriver

## Step 4

- Now have the new back panel on Iphone 4

To reassemble your device, follow these instructions in reverse order.
