

# Planet Eclipse Etha Eyes Replacement

This guide explains how to replace the eyes on the Planet Eclipse Etha paintball marker.

Written By: Hannah Lancaster

## INTRODUCTION

The Etha's Eyes determine there is a ball in the chamber before firing. This guide is useful for players who choose to upgrade their eyes, or for players who have a marker with broken eyes.

### TOOLS:

- Macro Bit Set (1)

## Step 1 — Regulator

- Firmly grasp hold of the ring on the bottom of the 90 degree silver fitting on the front of the gun.
  - Pull hard, but slowly, on the macroline where it comes out of silver piece until it comes out.
- (i)* The macroline is the black hose connecting the regulator to the tank connection.

## Step 2

- Remove the regulator by unscrewing it in a clockwise direction.

## Step 3 — Battery and Grip Panels

- Use the 5/64" hex key to remove the screw shown.
  - Remove the grip panel by gently holding the bottom of the panel and lifting the panel off.
- (i)* If you are only replacing the battery, skip the next step.
- (i)* The screws in this guide are interchangeable with those shown in the Eyes replacement guide.

## Step 4

- Flip the marker over and use the 5/64" hex key to remove the screw shown.
- Remove the grip panel by gently holding the bottom of the panel and lifting the panel off.

## Step 5

- Carefully remove the 9V battery and connector.
- Remove the 9V battery from the connector.

## Step 6 — Frame

- Carefully disconnect the three connectors from the circuit board.
- *i* Don't worry about remembering which direction the connectors go in, they will not fit in the board in the wrong direction.

## Step 7

- Use the 1/8" hex key to remove the two dome-headed screws by rotating them counter-clockwise.

## Step 8

**⚠** Be very careful during the step to avoid damage to the solenoid or wiring.

- Gently separate the top and bottom of the marker.

## Step 9 — Eyes

- Use the 5/64" hex key to turn the screw counterclockwise.
- Carefully remove the screw and place it off to the side.
- Remove the panel and place it off to the side.

## Step 10

- Carefully flip the marker over.
- Use the 5/64" hex key to turn the screw counterclockwise.
- Remove the screw and place it off to the side.
- Carefully remove the panel and place it off to the side.

## Step 11

- Grip the marker with one hand and gently pull the eyes out with your other hand.

To reassemble your device, follow these instructions in reverse order.
