Step 1 — Case Separation

⚠ Power off and remove the memory card.

● Using a Phillips #00 screwdriver, remove the four 6.4mm screws on the back casing.

Step 2

● Using your fingernail or a spudger, pry open the accessory port cover on the top of the device.

● Using a Phillips #00 screwdriver, remove the two 5.4mm screws hidden beneath the accessory port cover.

Step 3

- Remove the two 5.4mm Phillips #00 screws on the bottom of the device near the charging port.

Step 4

- Beginning at the sides of the device, use a plastic opening tool to separate the front and rear cases.

- Continue working your way around the device gently prying it open.

- ⚠ There are still wires holding the front and rear cases together. You may damage the connections if you yank the cases completely apart.

Step 5

- Gently separate the two cases, minding the battery and the touch screen controller connectors holding the two cases together.

Step 6

- Using a spudger, free the touch screen controller flex cable by gently prying up the connection.

Step 7

- Free the battery cable by gently prying up on the connection with a spudger.
Step 8

- Separate the front and rear cases.

Step 9 — GPS Antenna Cable

- Using the pointy end of the spudger, gently pry the GPS antenna cable off the wireless card.

Step 10

- Using the pointy end of a spudger, gently pry the GPS antenna cable off of the motherboard.

- Deroute the GPS antenna cable out of the casing and remove it.
