Step 1 — Back Cover

- Use a metal spudger to remove the small panels to the immediate left and right side of the camera.

Step 2
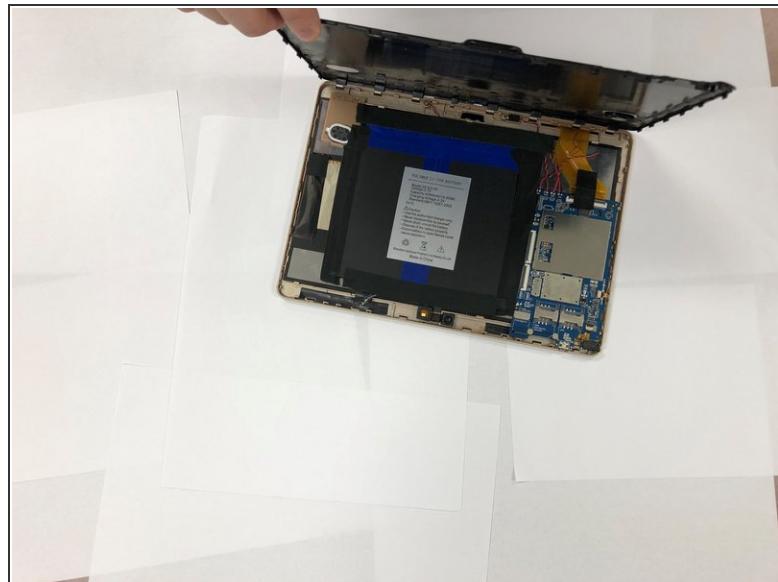

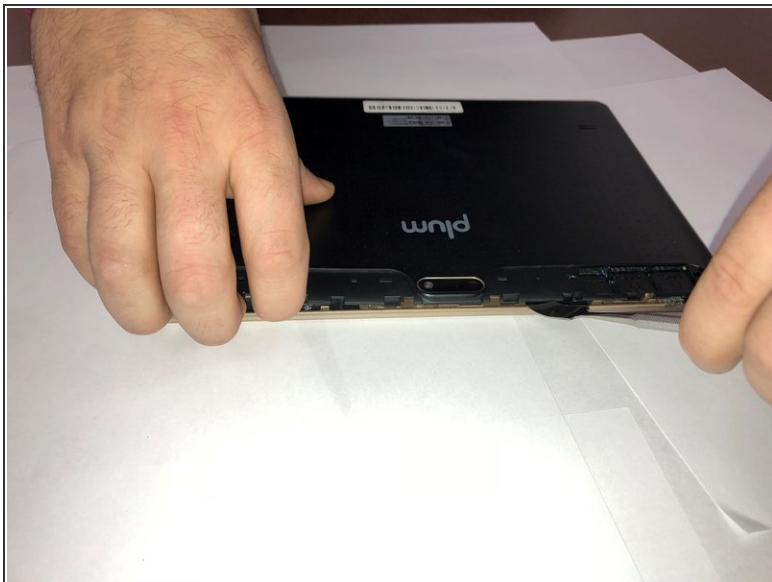

- Use a metal spudger to begin lifting the back cover.
- Then, create leverage and gently remove the entire cover.

Step 3 — Headphone Jack
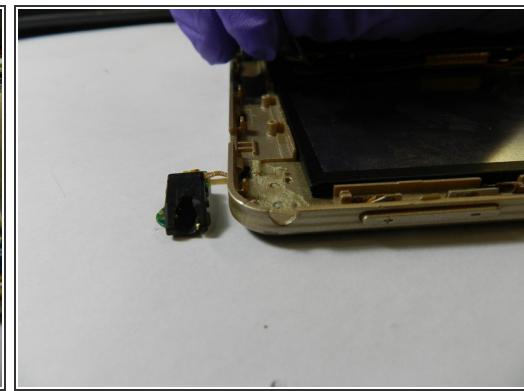

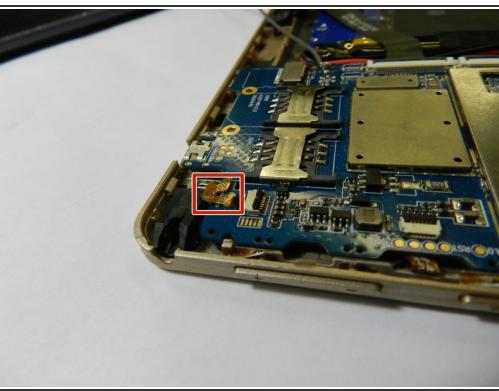

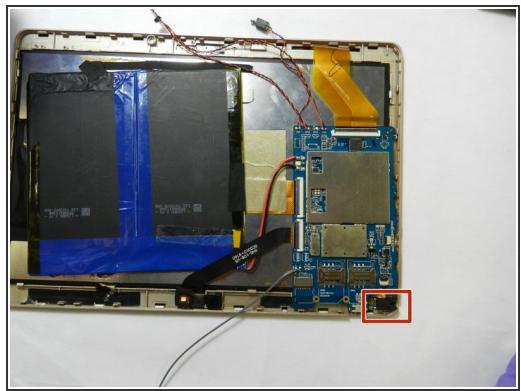

- Disconnect the ribbon cable connecting the headphone jack on the motherboard by lifting up on the black press fit connector with a plastic opening tool.

- Use a plastic opening tool to pry up the headphone jack from its place in the case.

- ⓘ The headphone jack is lightly adhered to the back case.

- ⚠ When removing the jack, be gentle with the ribbon wire because it is capable of tearing.

To reassemble your device, follow these instructions in reverse order.
