

Polar V800 Charging Port Cover Replacement

This guide demonstrates how to replace the charging port cover on the Polar V800 sports watch.

Written By: Nick B.

INTRODUCTION

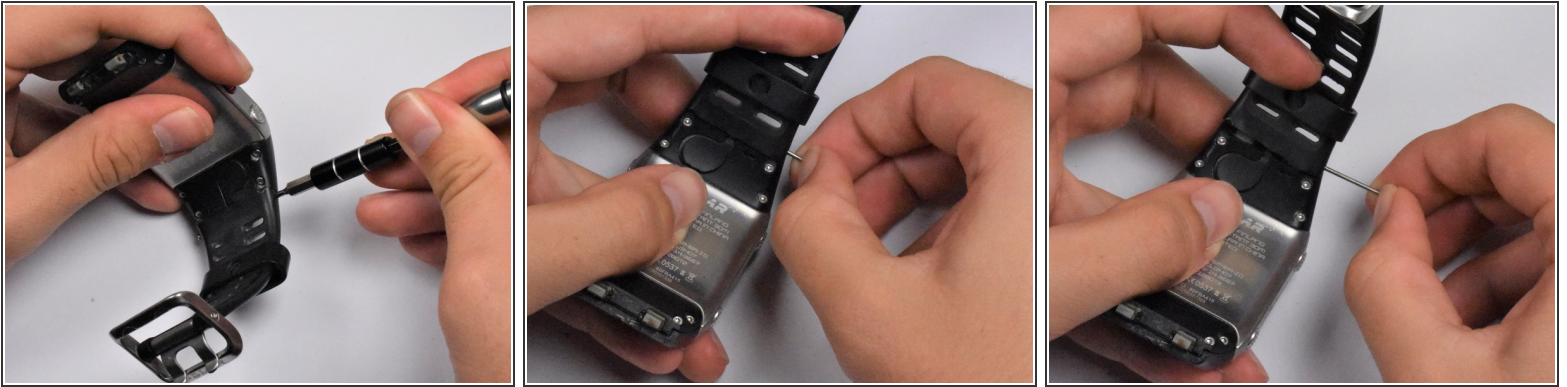

This guide will show how to replace the charging port cover of the Polar V800 sports watch. Replacement may be needed if the charging port cover wears out from use or if the charging port cover breaks off. The charging port cover provides the charging port with much need protection from the elements to avoid corrosion and residue build-up.

TOOLS:

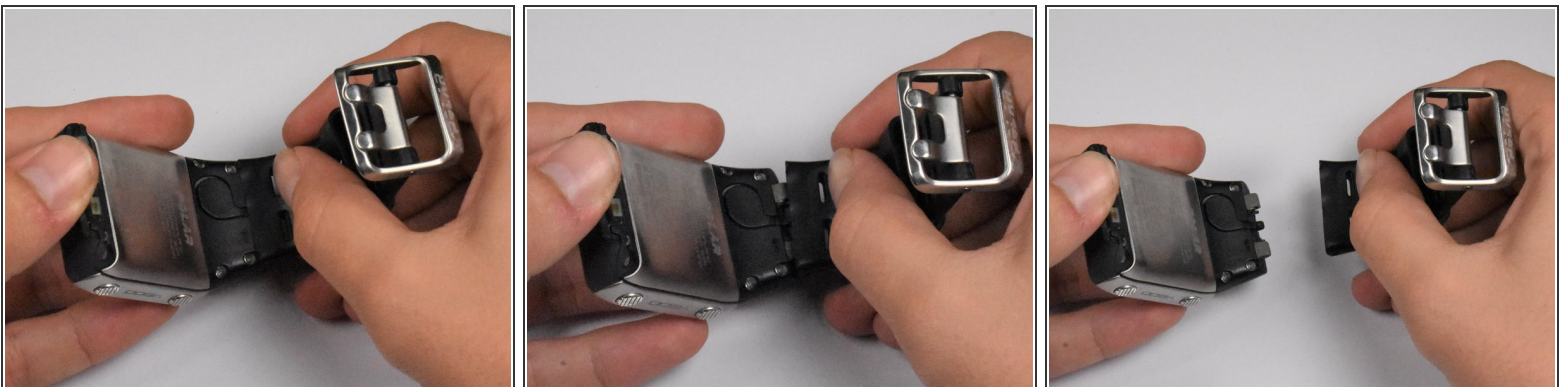

- [Paper Clip](#) (1)
-

Step 1 — Watch Band

- Using a narrow object like a paperclip, push the pins located in the watch band in the direction of the arrow indicated on the watch.
 - Completely pull out the pins.
- i** It isn't necessary to remove the watch band before replacing other parts of the watch, but it may make removal of other elements of the watch more accessible and clear.
- ★** When replacing the charging port cover, only take out the pin that is closest to the charging port cover.

Step 2

- To remove the watch band, pull each end of the watch band away from the watch frame.

Step 3 — Charging Port Cover

- Take off the charging port cover.

To reassemble your device, follow these instructions in reverse order.
