

Power Mac G4 Quicksilver Video Adapter Replacement

Written By: Cameron Christensen

INTRODUCTION

This guide will show you how to remove and replace the Video Adapter in your Power Mac 4 Quicksilver.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Opening the case

- The handle to open your computer is located on top of the right side panel.

Step 2

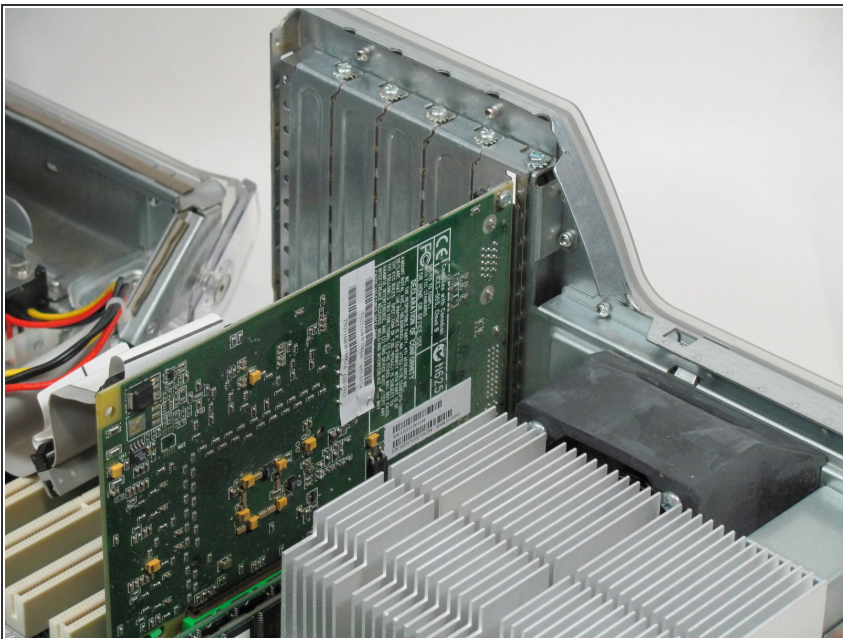

- Grab the circular handle and pull outward.

Step 3

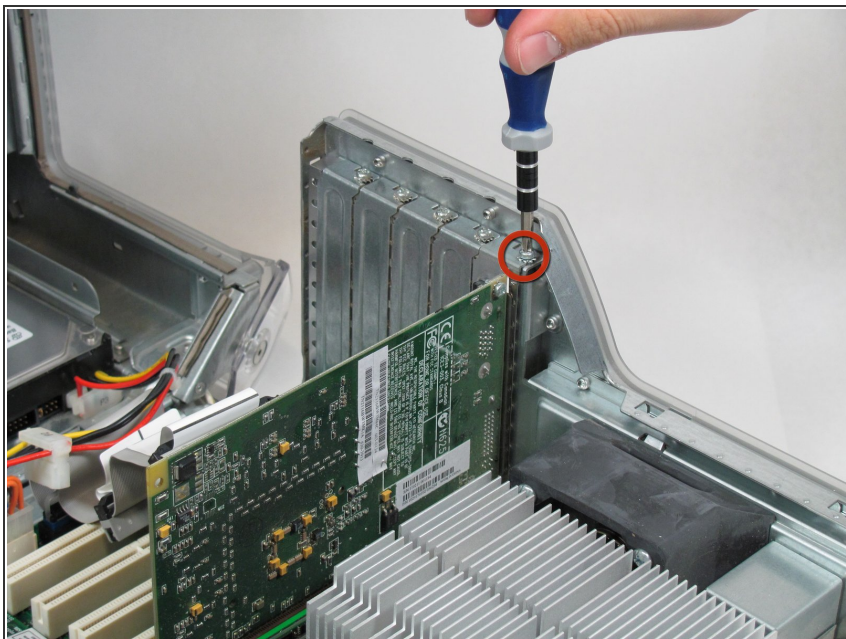

- Your computer is now open and ready for repair.

Step 4 — Video Adapter

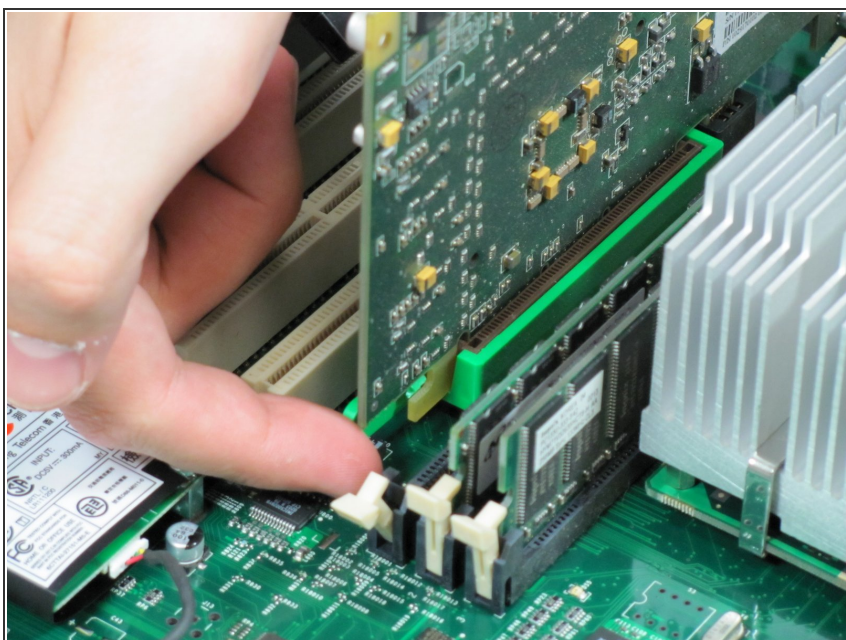

- This is your Power Mac G4's video adapter.

Step 5

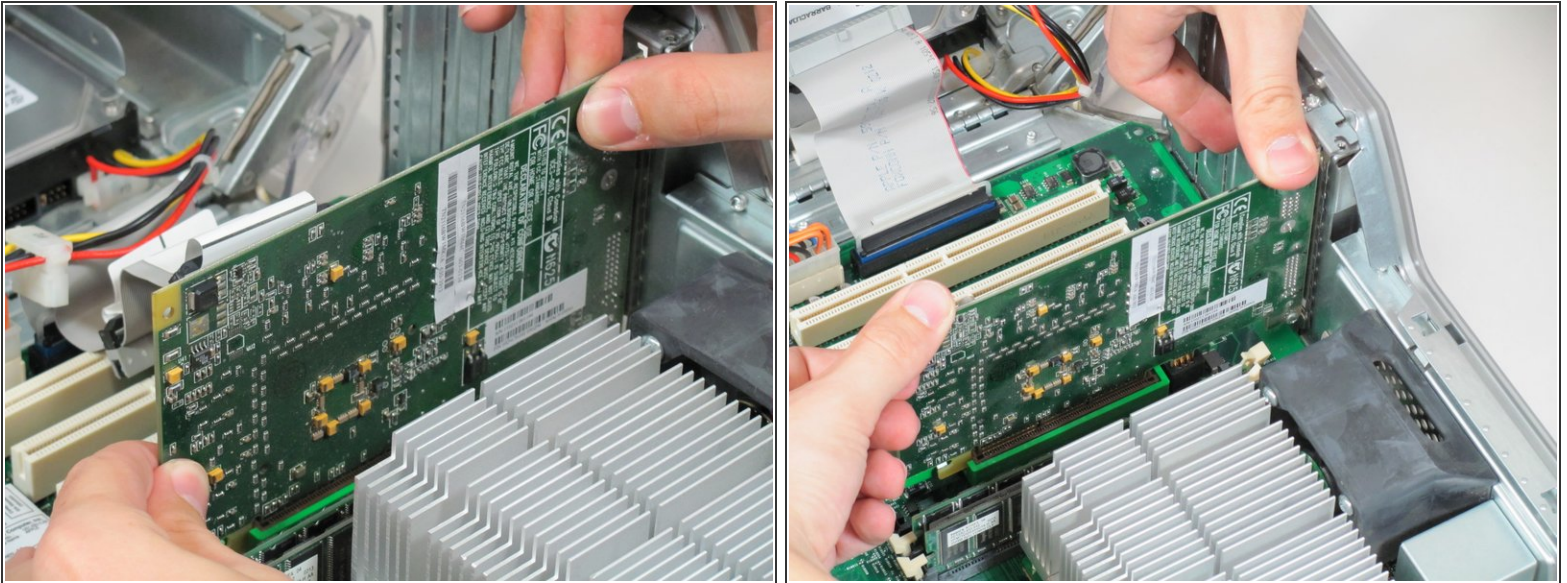

- Start by removing the screw holding the card to the chassis as shown.

Step 6

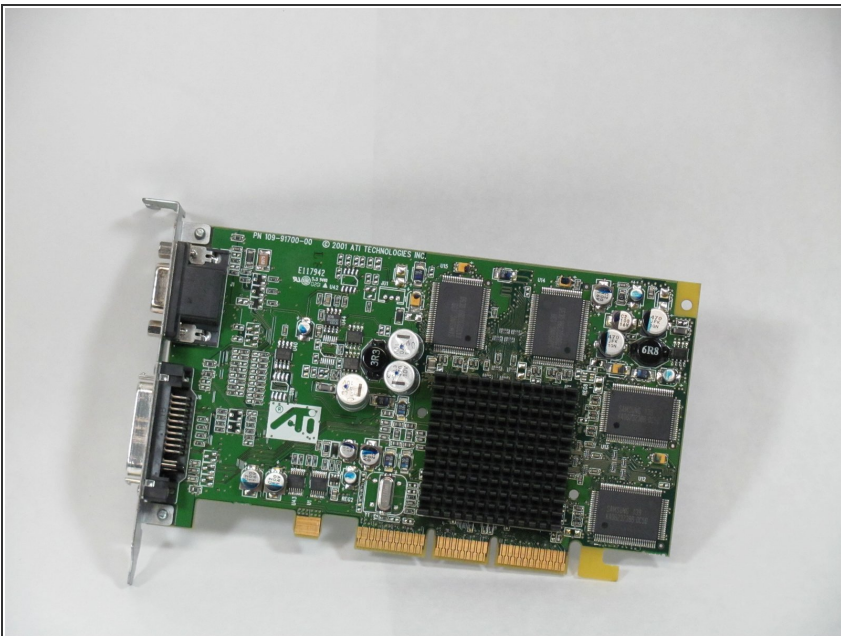

- Before lifting the card out, this small plastic tab needs to be pulled back there by releasing it entirely.

Step 7

- With the tab and screw removed, lift the card straight out.
- ⓘ When putting the card back in, take care to apply even pressure across the top with your thumbs. This will avoid damaging the card.

Step 8 — Video Adapter

- Your card is now completely removed and ready to be replaced.

To reassemble your device, follow these instructions in reverse order.
