

PowerBook 3400 M3553 Speaker Panel Replacement

How to remove the speaker panel to access the display and the speakers.

Written By: Michael Mondragon

INTRODUCTION

In order to access the display or replace any portion of the sound system you must first remove the speaker panel from the computer.

TOOLS:

- [T8 Torx Screwdriver](#) (1)
-

Step 1 — Battery

- Close the screen and turn the PowerBook over. Orient the computer so the text of the label is right side up.

Step 2

- Press and hold the button on the left of the front side, and slide the battery out.

Step 3 — Keyboard

- With a T8 torx screwdriver, remove the three 24mm torx screws along the middle of the back panel.

Step 4

- Turn the computer over and open the display. You should see that the keyboard is loose.
- ⚠ Before attempting to remove the keyboard, note that a ribbon cable connects the keyboard to the logic board. Improper removal may damage your keyboard.
- Carefully lift the front of the keyboard up slightly, and then slide the keyboard towards yourself.
 - Then carefully lift the top half of the keyboard, and rotate it towards yourself.

Step 5

- Loosen the ribbon cables connecting the keyboard to the computer by using a plastic opening tool to lift the tabs on either side of the cable port.
- Gently remove the ribbons from its tabs.

Step 6 — RAM

- Gently wiggle the RAM card to loosen the connection until it pulls free.

Step 7 — Speaker Panel

- Disconnect the wires from the port.

Step 8

- Remove the 7mm screw connecting the speaker panel to the computer.

Step 9

- To detach the speaker panel's ribbon cable, use a plastic opening tool to lift the tabs on both sides of the cable port.
- Once loose, pull the ribbon cable free.

Step 10

- Lift the lighting/audio panel from it's bottom corners and pull the panel towards yourself.

To reassemble your device, follow these instructions in reverse order.
