Step 3

- Place the camera so that the underside is facing up.
- Remove the four 5mm Phillips #1 screws.

Step 4

- Place the camera on a flat surface with its underside facing you.

- Gently pull up on the side panel to remove it from the camera.

Step 5 — Screen

- Remove the three 4 mm Phillips #1 screws holding the weight.
- Remove the weight.

Step 6

- Remove the two 4 mm Phillips #1 screws holding the back panel in place.

Step 7

- Remove the back panel away from the camera by applying pressure to it.
Step 8

- Set aside back panel for now.

- Remove the final 4 mm Phillips #1 screw holding the screen in place. It is very small and hard to see.

Step 9

- Carefully apply pressure, away from the camera, to the screen to detach it from the body.

- The white cord should still be connected to the body.

Step 10

- Lift the black clip upward.

- With the clip up, pull the white cord to the left. This will detach the screen from the body.

To reassemble your device, follow these instructions in reverse order.
