## Step 1 — Battery Wire

- Locate the six screws on the back of the speaker.
Step 2

- Unscrew each of the six screws, then set them aside.

Step 3

- Gently remove the back cover of the speaker.

Step 4

- Place the speaker upside down.

- Remove the battery cover located in the center of the speaker.

Step 7

- Remove the single motherboard screw.

Step 8
- Remove both of the screws holding the power socket to the bottom chassis.

Step 9

- Desolder and remove the old wire.

- ⬚ Insert the new wire and solder it into place.

To reassemble your device, follow these instructions in reverse order.
